GENERAL INFORMATION ABOUT THE TRUST

The Trust is an open-end management investment company consisting of multiple investment series. This SAI relates to the REX VolMAXX™ Long VIX Futures Strategy ETF (formerly, the REX VolMAXX™ Long VIX Weekly Futures Strategy ETF) and the REX VolMAXX™ Short VIX Futures Strategy ETF (formerly, the REX VolMAXX™ Short VIX Weekly Futures Strategy ETF) (each, a “Fund” and together, the “Funds”). The Trust was organized as a Delaware statutory trust on July 17, 2009. The Trust is registered with the Securities and Exchange Commission (the “SEC”) under the Investment Company Act of 1940, as amended, (the “1940 Act”) as an open-end management investment company and the offering of each Fund’s shares is registered under the Securities Act of 1933, as amended (the “Securities Act”).

Each Fund offers and issues shares at their net asset value (“NAV”) in aggregated lots of at least 50,000 (each, a “Creation Unit” or a “Creation Unit Aggregation”), generally in exchange for: (i) a basket of individual securities (the “Deposit Securities”) and (ii) an amount of cash (the “Cash Component”). Shares are redeemable only in Creation Unit Aggregations and, generally, in exchange for portfolio securities and a specified cash payment. The Trust reserves the right to offer an “all cash” option for creations and redemptions of Creation Units of each Fund. The shares of each Fund, as described in the Fund’s Prospectus, trade on the Cboe BZX Exchange, Inc. (the “Exchange”) at market prices that may be below, at, or above NAV per share of the Fund.

INVESTMENT POLICIES, TECHNIQUES AND RISK FACTORS

Exchange Traded Concepts, LLC (the “Adviser”) serves as the investment adviser to the Funds, each of which is a non-diversified open-end management investment company. Each Fund’s investment objective and principal investment strategies, as well as other important information, are described in the Prospectus for the Funds, which should be read together with this SAI. The investment objective of each Fund is non-fundamental and may be changed without the consent of the holders of a majority of a Fund’s outstanding shares. The day-to-day portfolio management of the Funds is provided by Vident Investment Advisory, LLC (the “Sub-Adviser”), and is subject to the supervision of the Adviser and the Board. The Sub-Adviser selects securities for each Fund’s investment pursuant to an “active” management strategy for security selection and portfolio construction.

As described more fully in each Fund’s Prospectus, each Fund seeks to achieve its investment objective, under normal circumstances, by obtaining investment exposure, through the use of the financial instruments and investments described in each Fund’s Principal Investment Strategies, to an actively managed portfolio of futures contracts based on the Chicago Board Options Exchange, Incorporated (“CBOE”) Volatility Index (the “VIX Index”) (“VIX Futures Contracts”).

The VIX Index is an index designed to measure the market price of volatility in large cap U.S. stocks over 30 days in the future, and is calculated based on the prices of certain put and call options on the S&P 500® Index (the “S&P 500®”). During periods of market instability, the implied level of volatility of the S&P 500® typically increases and, consequently, the prices of options linked to the S&P 500® typically increase (assuming all other relevant factors remain constant or have negligible changes). This, in turn, causes the volatility readings of the VIX Index to increase.

The CBOE may list for trading VIX Futures Contracts with up to six near-term expiration weeks, nine near-term serial months and five months on the February quarterly cycle. VIX Futures Contracts allow investors the ability to invest based on their view of forward implied market volatility. Investors that believe the forward implied market volatility of the S&P 500®, as represented by VIX Futures Contracts, will increase may buy VIX Futures Contracts. Conversely, investors that believe that the forward implied market volatility

of the S&P 500[®], as represented by VIX Futures Contracts, will decline may sell VIX Futures Contracts. VIX Futures Contracts are reported by Bloomberg Finance L.P. under the ticker symbol “VX.”

While the VIX Index represents a measure of the current expected volatility of the S&P 500[®] over the next 30 days, the prices of VIX Futures Contracts are based on the current expectation of what the expected 30-day volatility will be at a particular time in the future (on the expiration date). The VIX Index and VIX Futures Contracts generally behave quite differently. To illustrate, on January 30, 2015, the VIX Index was 20.97 and the price of the February 2015 VIX Futures Contracts expiring on February 18, 2015 was 21.025. In this example, the price of the VIX Index represented the 30-day implied, or “spot,” volatility (the volatility expected for the period from January 30, 2015 to March 1, 2015) of the S&P 500[®] and the February VIX Futures Contracts represented forward implied volatility (the volatility expected for the period from February 18, 2015 to March 20, 2015) of the S&P 500[®]. Unlike many indices, the VIX Index is not an investable index, and an investor cannot create a position equivalent to one in VIX Futures Contracts by buying the VIX Index and holding the position to the futures expiration date while financing the transaction. Moreover, the price of a VIX Futures Contract can be lower, equal to or higher than the VIX Index, depending on whether the market expects volatility to be lower, equal to or higher in the 30-day forward period covered by the VIX Futures Contract than in the 30-day spot period covered by the VIX Index.

Each Fund expects to gain significant exposure to VIX Futures Contracts, which are considered broad-based security index futures, by investing up to 25% of its total assets, as measured at the end of every quarter of the Fund’s taxable year, in a wholly-owned and controlled Cayman Islands subsidiary (the “Subsidiary” and together, the “Subsidiaries”). The purpose of this investment in the Subsidiary is to provide the Fund with an effective means of obtaining exposure to VIX Futures Contracts in a manner consistent with U.S. federal tax law requirements applicable to regulated investment companies. As a result, each Fund may be considered to be investing indirectly in the investments of its Subsidiary. For that reason, references in this SAI to the Funds may also include the Subsidiaries. The Subsidiaries may invest to a greater extent in broad-based security index futures, including VIX Futures Contracts, than the Funds.

Each Subsidiary is managed by the Adviser and sub-advised by the Sub-Adviser. For each Subsidiary, pursuant to a management agreement between the Subsidiary and the Adviser (the “Subsidiary Agreement”), the Adviser will: (i) provide management services; (ii) pay all expenses incurred by the Subsidiary except for the fee paid to the Adviser pursuant to the Subsidiary Agreement (the “Subsidiary Management Fee”), interest, taxes, brokerage commissions and other expenses incurred in placing or settlement of orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, and extraordinary expenses; and, in consideration thereof, (iii) receive the Subsidiary Management Fee. The Adviser has contractually agreed to waive the management fee it receives from each Fund in an amount equal to the Subsidiary Management Fee, if any, paid to the Adviser by each Fund’s Subsidiary. The Adviser, and not the Funds or their respective Subsidiaries, pays the Sub-Adviser’s fees. Please refer to the section in this SAI titled “Dividends, Distributions, and Taxes” for information about certain tax aspects of the Funds’ investment in the Subsidiaries.

As is further discussed in each Fund’s Prospectus, in addition to each Fund’s investment in the Subsidiary and VIX Futures Contracts and options contracts on the VIX Index, each Fund also may invest in the following instruments to obtain exposure to VIX Futures Contracts: (1) swap agreements; (2) exchange-traded funds (“ETFs”), exchange-traded closed-end funds, other investment companies registered under the 1940 Act, and other pooled investment vehicles (collectively, “Underlying Funds”); (3) exchange-traded notes (“ETNs”); and (4) fixed income securities (namely, commercial paper and U.S. government obligations), bank instruments, cash, and other cash equivalents to collateralize its exposure to the VIX Futures Contracts and for investment purposes. The Funds may invest, directly and indirectly, in inverse index-based Underlying Funds or ETNs (i.e., Underlying Funds or ETNs that seek to return the opposite of the performance of the index or benchmark they seek to track), but each Fund will limit its long positions in

such vehicles or instruments to no more than 15% of its net assets consistent with SEC Staff guidance. Pursuant to the Funds' Rule 19b-4 order issued by the SEC, the Funds currently may not invest in leveraged index-based Underlying Funds or ETNs (i.e., Underlying Funds or ETNs that seek to return a multiple of the performance of the index or benchmark they seek to track).

The investment techniques and instruments described below and in each Fund's Prospectus may, consistent with each Fund's investment objective and investment policies, be used by a Fund if, in the opinion of the Adviser or the Sub-Adviser, such strategies will be advantageous to the Fund. A Fund may not invest in all of the instruments and techniques described below. In addition, each Fund is free to reduce or eliminate its activity with respect to any of the investment techniques described below without changing the Fund's fundamental investment policies, and the Funds will periodically change the composition of their portfolios to best meet their respective investment objectives. For more information about each Fund's principal strategies and risks, please see the Fund's Prospectus.

Non-Diversification

Each Fund is classified as a non-diversified investment company under the 1940 Act. A "non-diversified" classification means that a Fund is not limited by the 1940 Act with regard to the percentage of their assets that may be invested in the securities of a single issuer. This means that a Fund may invest a greater portion of its assets in the securities of a single issuer than a diversified fund. This may have an adverse effect on a Fund's performance or subject the Fund's Shares to greater price volatility than more diversified investment companies. Moreover, in pursuing its objective, a Fund may hold the securities of a single issuer in an amount exceeding 10% of the market value of the outstanding securities of the issuer, subject to restrictions imposed by the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"). In particular, as a Fund's size grows and its assets increase, it will be more likely to hold more than 10% of the securities of a single issuer if the issuer has a relatively small public float.

Commercial Paper

Commercial paper is a short-term obligation with a maturity ranging from one to 270 days issued by banks, corporations and other borrowers. Such investments are unsecured and usually discounted. The Funds may invest in commercial paper rated A-1 or A-2 by Standard and Poor's Ratings Services ("S&P") or Prime-1 or Prime-2 by Moody's Investors Service, Inc. ("Moody's"). See "Appendix A –Description of Ratings" for a description of commercial paper ratings.

Exchange-Traded Notes

The Funds may invest in ETNs, which are senior, unsecured unsubordinated debt securities issued by an underwriting bank that are designed to provide returns that are linked to a particular benchmark less investor fees. ETNs have a maturity date and, generally, are backed only by the creditworthiness of the issuer. As a result, the value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in the underlying market (e.g., the commodities market), changes in the applicable interest rates, and changes in the issuer's credit rating and economic, legal, political or geographic events that affect the referenced market. ETNs also may be subject to credit risk.

It is expected that the issuer's credit rating will be investment grade at the time of investment, however, the credit rating may be revised or withdrawn at any time and there is no assurance that a credit rating will remain in effect for any given time period. If a rating agency lowers the issuer's credit rating or there is a decline in the perceived creditworthiness of the issuer, the value of the ETN will decline as a lower credit rating reflects a greater risk that the issuer will default on its obligation to ETN investors. A Fund must pay an investor fee when investing in an ETN, which will reduce the amount of return on investment at maturity or upon redemption. There may be restrictions on a Fund's right to redeem its investment in an ETN, which

is meant to be held until maturity. There are no periodic interest payments for ETNs, and principal typically is not protected. As is the case with other exchange-traded products, an investor could lose some of or the entire amount invested in ETNs. A Fund's decision to sell its ETN holdings may be limited by the availability of a secondary market.

Fixed Income Securities

The Funds may invest in fixed income securities. The market value of the fixed income securities in which a Fund invests will change in response to interest rate changes and other factors. During periods of falling interest rates, the values of outstanding fixed income securities generally rise. Conversely, during periods of rising interest rates, the values of such securities generally decline. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. Changes by recognized agencies in the rating of any fixed income security and in the ability of an issuer to make payments of interest and principal also affect the value of these investments. Changes in the value of these securities will not necessarily affect cash income derived from these securities but will affect a Fund's NAV. Additional information regarding fixed income securities is described below:

- **Duration.** Duration is a measure of the expected change in value of a fixed income security for a given change in interest rates. For example, if interest rates changed by one percent (1%), the value of a security having an effective duration of two years generally would vary by two percent (2%). Duration takes the length of the time intervals between the present time and time that the interest and principal payments are scheduled, or in the case of a callable bond, expected to be received, and weighs them by the present values of the cash to be received at each future point in time.
- **Variable and Floating Rate Securities.** Variable and floating rate instruments involve certain obligations that may carry variable or floating rates of interest, and may involve a conditional or unconditional demand feature. Such instruments bear interest at rates which are not fixed, but which vary with changes in specified market rates or indices. The interest rates on these securities may be reset daily, weekly, quarterly, or some other reset period, and may have a set floor or ceiling on interest rate changes. There is a risk that the current interest rate on such obligations may not accurately reflect existing market interest rates. A demand instrument with a demand notice exceeding seven days may be considered illiquid if there is no secondary market for such security.

Debt Securities. A debt security is a security consisting of a certificate or other evidence of a debt (secured or unsecured) on which the issuing company or governmental body promises to pay the holder thereof a fixed, variable, or floating rate of interest for a specified length of time, and to repay the debt on the specified maturity date. Some debt securities, such as zero coupon bonds, do not make regular interest payments but are issued at a discount to their principal or maturity value. Debt securities include a variety of fixed income obligations, including, but not limited to, corporate bonds, government securities, municipal securities, convertible securities, mortgage-backed securities, and asset-backed securities. Debt securities include investment-grade securities, non-investment-grade securities, and unrated securities. Debt securities are subject to a variety of risks, such as interest rate risk, income risk, call/prepayment risk, inflation risk, credit risk, and (in the case of foreign securities) country risk and currency risk.

Corporate Debt Securities. Corporate debt securities are typically fixed-income securities issued by businesses to finance their operations, but may also include bank loans to companies. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities. The primary differences between the different types of corporate debt securities are their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured. The broad category of

corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment-grade or below investment-grade and may carry variable or floating rates of interest.

Because of the wide range of types, and maturities, of corporate debt securities, as well as the range of creditworthiness of its issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment-grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that a Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment-grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities. Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms.

Non-Investment-Grade Debt Securities. Non-investment-grade securities, also referred to as "high yield securities" or "junk bonds," are debt securities that are rated lower than the four highest rating categories by a NRSRO (for example, lower than Baa3 by Moody's Investors Service, Inc. or lower than BBB- by Standard & Poor's) or are determined to be of comparable quality by the Advisor. These securities are generally considered to be, on balance, predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation and will generally involve more credit risk than securities in the investment-grade categories. Investment in these securities generally provides greater income and increased opportunity for capital appreciation than investments in higher quality securities, but they also typically entail greater price volatility and principal and income risk.

Analysis of the creditworthiness of issuers of high yield securities may be more complex than for issuers of investment-grade securities. Thus, reliance on credit ratings in making investment decisions entails greater risks for high yield securities than for investment-grade debt securities. The success of a fund's investment adviser in managing high yield securities is more dependent upon its own credit analysis than is the case with investment-grade securities.

Some high yield securities are issued by smaller, less-seasoned companies, while others are issued as part of a corporate restructuring, such as an acquisition, merger, or leveraged buyout. Companies that issue high yield securities are often highly leveraged and may not have available to them more traditional methods of financing. Therefore, the risk associated with acquiring the securities of such issuers generally is greater than is the case with investment-grade securities. Some high yield securities were once rated as investment-grade but have been downgraded to junk bond status because of financial difficulties experienced by their issuers.

The market values of high yield securities tend to reflect individual issuer developments to a greater extent than do investment-grade securities, which in general react to fluctuations in the general level of interest rates. High yield securities also tend to be more sensitive to economic conditions than are investment-grade

securities. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in junk bond prices because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its debt securities. If an issuer of high yield securities defaults, in addition to risking payment of all or a portion of interest and principal, a fund investing in such securities may incur additional expenses to seek recovery.

The secondary market on which high yield securities are traded may be less liquid than the market for investment-grade securities. Less liquidity in the secondary trading market could adversely affect the ability of a fund to sell a high yield security or the price at which a fund could sell a high yield security, and could adversely affect the daily NAV of fund shares. When secondary markets for high yield securities are less liquid than the market for investment-grade securities, it may be more difficult to value the securities because such valuation may require more research, and elements of judgment may play a greater role in the valuation because there is less reliable, objective data available.

Unrated Debt Securities. Unrated debt, while not necessarily lower in quality than rated securities, may not have as broad a market. Because of the size and perceived demand for the issue, among other factors, certain issuers may decide not to pay the cost of getting a rating for their bonds. The creditworthiness of the issuer, as well as any financial institution or other party responsible for payments on the security, will be analyzed to determine whether to purchase unrated bonds.

Debt Securities Issued by the International Bank for Reconstruction and Development (“World Bank”). Debt securities issued by the World Bank may include high quality global bonds backed by 185 member governments, including the United States, Japan, Germany, France and the United Kingdom, as well as in bonds in “non-core” currencies, including emerging markets and European accession countries with ratings of AAA or Aaa, structured notes, and discount notes represented by certificates, in bearer form only, or in un-certified form (Book Entry Discount Notes) with maturities of 360 days or less at a discount, and in the case of Discount Notes, in certified form only and on an interest bearing basis in the U.S. and Eurodollar markets.

Futures and Options Transactions; CFTC Regulation

Futures and Options on Futures. The Funds will engage in futures transactions and may engage in options transactions. Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a specific security at a specified future time and at a specified price. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. A fund will reduce the risk that it will be unable to close out a futures contract by only entering into futures contracts that are traded on a national futures exchange regulated by the Commodities Futures Trading Commission (“CFTC”). The Funds may use futures contracts and related options for *bona fide* hedging; attempting to offset changes in the value of securities held or expected to be acquired or be disposed of; attempting to gain exposure to a particular market, index, or instrument; or other risk management purposes.

The Funds may buy and sell index futures contracts with respect to any index that is traded on a recognized exchange or board of trade. An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally struck. No physical delivery of the securities comprising the index is made. Instead, settlement in cash must occur upon the termination of the contract, with the settlement being the difference between the contract price, and the actual level of the stock index at the expiration of the contract. Generally, contracts are closed out prior to the expiration date of the contract.

When a Fund purchases or sells a futures contract, or sells an option thereon, it is required to “cover” its position in order to limit leveraging and related risks. To cover its position, the Fund may maintain with its custodian bank (and marked-to-market on a daily basis), a segregated account consisting of cash or liquid securities that, when added to any amounts deposited with a futures commission merchant as margin, are equal to the market value of the futures contract or otherwise “cover” its position in a manner consistent with the 1940 Act or the rules and SEC interpretations thereunder. If the Fund continues to engage in the described securities trading practices and properly segregates assets, the segregated account will function as a practical limit on the amount of leverage which the Fund may undertake and on the potential increase in the speculative character of the Fund’s outstanding portfolio securities. Additionally, such segregated accounts will generally assure the availability of adequate funds to meet the obligations of the Fund arising from such investment activities.

A Fund may also cover its long position in a futures contract by purchasing a put option on the same futures contract with a strike price (*i.e.*, an exercise price) as high or higher than the price of the futures contract. In the alternative, if the strike price of the put is less than the price of the futures contract, the Fund will maintain, in a segregated account, cash or liquid securities equal in value to the difference between the strike price of the put and the price of the futures contract. A Fund may also cover its long position in a futures contract by taking a short position in the instruments underlying the futures contract, or by taking positions in instruments with prices which are expected to move relatively consistently with the futures contract. A Fund may cover its short position in a futures contract by taking a long position in the instruments underlying the futures contracts, or by taking positions in instruments with prices which are expected to move relatively consistently with the futures contract.

A Fund may cover its sale of a call option on a futures contract by taking a long position in the underlying futures contract at a price less than or equal to the strike price of the call option. In the alternative, if the long position in the underlying futures contract is established at a price greater than the strike price of the written (sold) call, the Fund will maintain, in a segregated account, cash or liquid securities equal in value to the difference between the strike price of the call and the price of the futures contract. The Fund may also cover its sale of a call option by taking positions in instruments with prices which are expected to move relatively consistently with the call option. The Fund may cover its sale of a put option on a futures contract by taking a short position in the underlying futures contract at a price greater than or equal to the strike price of the put option, or, if the short position in the underlying futures contract is established at a price less than the strike price of the written put, the Fund will maintain, in a segregated account, cash or liquid securities equal in value to the difference between the strike price of the put and the price of the futures contract. The Fund may also cover its sale of a put option by taking positions in instruments with prices which are expected to move relatively consistently with the put option.

There are significant risks associated with a Fund’s use of futures contracts related options, including the following: (1) the success of a hedging strategy, if any, may depend on an investment adviser’s ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect or no correlation between the changes in market value of the securities held by the Fund and the prices of futures and options on futures; (3) there may not be a liquid secondary market for a futures contract or option; (4) trading restrictions or limitations may be imposed by an exchange; and (5) government regulations may restrict trading in futures contracts and options on futures. In addition, some strategies reduce a Fund’s exposure to price fluctuations, while others tend to increase its market exposure.

Options. The Funds may invest may purchase and write (sell) put and call options on indices and enter into related closing transactions. A put option on a security gives the purchaser of the option the right to sell, and the writer of the option the obligation to buy, the underlying security at any time during the option period. A call option on a security gives the purchaser of the option the right to buy, and the writer of the option the

obligation to sell, the underlying security at any time during the option period. The premium paid to the writer is the consideration for undertaking the obligations under the option contract.

Put and call options on indices are similar to options on securities except that options on an index give the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the underlying index is greater than (or less than, in the case of puts) the exercise price of the option. This amount of cash is equal to the difference between the closing price of the index and the exercise price of the option, expressed in dollars multiplied by a specified number. Thus, unlike options on individual securities, all settlements are in cash, and gain or loss depends on price movements in the particular market represented by the index generally, rather than the price movements in individual securities.

All options written on indices or securities must be covered. The SEC staff has indicated that a written call option on a security may be covered if a fund: (1) owns the security underlying the call until the option is exercised or expires; (2) holds an American-style call on the same security as the call written with an exercise price (a) no greater than the exercise price of the call written or (b) greater than the exercise price of the call written if the difference is maintained by the Fund in cash or other liquid assets designated on the Fund's records or placed in a segregated account with the Fund's custodian; (3) has an absolute and immediate right to acquire the security without additional cost (or if additional consideration is required, cash or other liquid assets in such amount have been segregated); or (4) segregates cash or other liquid assets on the Fund's records or with the custodian in an amount equal to (when added to any margin on deposit) the current market value of the call option, but not less than the exercise price, marked to market daily. If the call option is exercised by the purchaser during the option period, the seller is required to deliver the underlying security against payment of the exercise price or pay the difference. The seller's obligation terminates upon expiration of the option period or when the seller executes a closing purchase transaction with respect to such option.

All put options written by a Fund will be covered by: (1) segregating cash, cash equivalents, such as U.S. Treasury securities or overnight repurchase agreements, or other liquid assets on the Fund's records or with the custodian having a value at least equal to exercise price of the option (less cash received, if any); or (2) holding a put option on the same security as the option written where the exercise price of the written put option is (i) equal to or higher than the exercise price of the option written or (ii) less than the exercise price of the option written provided the Fund segregates cash or other liquid assets in the amount of the difference.

A Fund may trade put and call options on securities, securities indices and currencies, as the Adviser or Sub-Adviser determines is appropriate in seeking the Fund's investment objective, and except as restricted by the Fund's investment limitations.

The initial purchase (sale) of an option contract is an "opening transaction." In order to close out an option position, a Fund may enter into a "closing transaction," which is simply the purchase of an option contract on the same security with the same exercise price and expiration date as the option contract originally opened. If a Fund is unable to effect a closing purchase transaction with respect to an option it has written, it will not be able to sell the underlying security until the option expires or the Fund delivers the security upon exercise.

A Fund may purchase put and call options on securities to protect against a decline in the market value of the securities in its portfolio or to anticipate an increase in the market value of securities that the Fund may seek to purchase in the future. A Fund purchasing put and call options pays a premium; therefore, if price movements in the underlying securities are such that exercise of the options would not be profitable for the Fund, loss of the premium paid may be offset by an increase in the value of the Fund's securities or by a decrease in the cost of acquisition of securities by the Fund.

A Fund may write covered call options on securities as a means of increasing the yield on its assets and as a means of providing limited protection against decreases in its market value. When the Fund writes an option, if the underlying securities do not increase or decrease to a price level that would make the exercise of the option profitable to the holder thereof, the option generally will expire without being exercised and the Fund will realize as profit the premium received for such option. When a call option of which the Fund is the writer is exercised, the Fund will be required to sell the underlying securities to the option holder at the strike price, and will not participate in any increase in the price of such securities above the strike price. When a put option of which the Fund is the writer is exercised, the Fund will be required to purchase the underlying securities at a price in excess of the market value of such securities.

A Fund may purchase and write options on an exchange or over-the-counter. OTC options differ from exchange-traded options in several respects. They are transacted directly with dealers and not with a clearing corporation, and therefore entail the risk of non-performance by the dealer. OTC options are available for a greater variety of securities and for a wider range of expiration dates and exercise prices than are available for exchange-traded options. Because OTC options are not traded on an exchange, pricing is done normally by reference to information from a market maker. It is the SEC's position that OTC options are generally illiquid.

The market value of an option generally reflects the market price of an underlying security. Other principal factors affecting market value include supply and demand, interest rates, the pricing volatility of the underlying security and the time remaining until the expiration date.

Risks associated with options transactions include: (1) the success of a hedging strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect correlation between the movement in prices of options and the securities underlying them; (3) there may not be a liquid secondary market for options; and (4) while the Fund will receive a premium when it writes covered call options, it may not participate fully in a rise in the market value of the underlying security.

CFTC Regulation. The Funds are subject to regulation under the Commodity Exchange Act ("CEA") and Commodity Futures Trading Commission ("CFTC") rules as commodity pools. The Adviser is registered as a commodity pool operator ("CPO"), and the Funds will be operated in accordance with applicable CFTC rules. Regulation as commodity pools may have negative effects on the ability of the Funds to engage in their planned investment programs, while the Adviser's registration as a CPO imposes additional laws, regulations and enforcement policies, which could increase compliance costs and may affect the operations and financial performance of the Funds. However, the Funds' status as commodity pools and the Adviser's registration as a CPO are not expected to materially adversely affect the ability of the Funds to achieve their investment objectives.

Illiquid Securities

While the Funds do not anticipate doing so, the Funds may purchase or hold illiquid securities, including securities that are not readily marketable and securities that are not registered ("restricted securities") under the Securities Act, but which can be offered and sold to "qualified institutional buyers" under Rule 144A under the Securities Act, as long as the Funds do not invest more than 15% of their net assets in illiquid securities. If the percentage of a Fund's net assets invested in illiquid securities exceeds 15% due to market activity, the Fund will take appropriate measures to reduce its holdings of illiquid securities. The term "illiquid securities" for this purpose means securities that cannot be disposed of within seven days in the ordinary course of business at approximately the amount at which a Fund has valued the securities. Under the current guidelines of the staff of the SEC, illiquid securities also are considered to include, among other securities, purchased OTC options, certain cover for OTC options, repurchase agreements with maturities in

excess of seven days, and certain securities whose disposition is restricted under the federal securities laws. The Funds may not be able to sell illiquid securities when the Sub-Adviser considers it desirable to do so or may have to sell such securities at a price that is lower than the price that could be obtained if the securities were more liquid. In addition, the sale of illiquid securities also may require more time and may result in higher dealer discounts and other selling expenses than does the sale of securities that are not illiquid. Illiquid securities also may be more difficult to value due to the unavailability of reliable market quotations for such securities, and investment in illiquid securities may have an adverse impact on NAV.

Investments in Other Investment Companies

The Funds will invest in the securities of other investment companies to the extent that such an investment would be consistent with the requirements of Section 12(d)(1) of the 1940 Act, or any rule, regulation or order of the SEC or interpretation thereof. Generally, a fund may invest in the securities of another investment company (the “acquired company”) provided that the fund, immediately after such purchase or acquisition, does not own in the aggregate: (i) more than 3% of the total outstanding voting stock of the acquired company; (ii) securities issued by the acquired company having an aggregate value in excess of 5% of the value of the total assets of the fund; or (iii) securities issued by the acquired company and all other investment companies (other than Treasury stock of the fund) having an aggregate value in excess of 10% of the value of the total assets of the fund. The Trust may enter into agreements with several unaffiliated investment companies that permit, pursuant to an SEC order, the Fund to purchase shares of those investment companies beyond the Section 12(d)(1) limits described above. In addition, the Funds may rely on exemptions available under the 1940 Act or the rules thereunder to invest in excess of the limits stated above. Registered investment companies are permitted to invest in the Funds beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an exemptive order issued by the SEC to the Trust, including that such investment companies enter into an agreement with the relevant Fund. However, so long as the Funds intend to invest in securities of other investment companies beyond the limits set forth in Section 12(d)(1)(A), registered investment companies are not permitted to rely on the exemptive relief.

When a Fund invests in, and thus, is a shareholder of, another investment company, the Fund’s shareholders will indirectly bear the Fund’s proportionate share of the fees and expenses paid by such other investment company, including advisory fees, in addition to both the management fees payable directly by the Fund to the Fund’s own investment adviser and the other expenses that the Fund bears directly in connection with the Fund’s own operations.

The Funds expect to invest in investment companies that are index-based, which hold substantially all of their assets in securities representing a specific index. The main risk of investing in index-based investments is the same as investing in a portfolio of securities comprising the index. The market prices of index-based investments will fluctuate in accordance with both changes in the market value of their underlying portfolio securities and due to supply and demand for the instruments on the exchanges on which they are traded (which may result in their trading at a discount or premium to their NAVs). Index-based investments may not replicate exactly the performance of their specific index because of transaction costs and the temporary unavailability of certain component securities of the index.

The Funds also may invest in investment companies that are actively managed.

Each Fund may invest in closed-end funds. Closed-end funds are pooled investment vehicles that are registered under the 1940 Act and whose shares are listed and traded on U.S. national securities exchanges. Like any stock, a closed-end fund’s share price will fluctuate in response to market conditions and other factors. Secondary market trading prices of closed-end funds should be expected to fluctuate and such prices may be higher (i.e., at a premium) or lower (i.e., at a discount) than the net asset value of a closed-end fund’s portfolio holdings. Closed-end fund shares frequently trade at persistent and ongoing discounts to the net

asset value of the closed-end fund's portfolio investments. There can be no guarantee that shares of a closed-end fund held by a Fund will not trade at a persistent and ongoing discount. Nor can there be any guarantee that an active market in shares of the closed-end funds held by a Fund will exist. A Fund may not be able to sell closed-end fund shares at a price equal to the net asset value of the closed-end fund. While a Fund seeks to take advantage of differences between the net asset value of closed-end fund shares and any secondary market premiums or discounts, the Fund may not be able to do so. In addition, there can be no assurance that any closed-end fund will achieve its stated investment objective. While a Fund investing in closed-end funds attempts to diversify its exposure to such investments, lackluster performance of a single closed-end fund can have a negative impact on the performance of the Fund as a whole. A Fund may lose money on its investment in any closed-end fund which, in turn, may cause investors to lose money on an investment in the Fund.

Investment in the Subsidiaries

Each Fund expects to achieve significant exposure to broad-based security index futures and other commodity futures contracts through investment in a Subsidiary. Such investment may not exceed 25% of a Fund's total assets, as measured at the end of every quarter of the Fund's taxable year. Each Subsidiary will invest in derivatives, including futures contracts and commodity-linked instruments, and other investments intended to serve as margin or collateral or otherwise support the Subsidiary's derivatives positions. Unlike the Funds, the Subsidiaries may invest without limitation in futures and may use leveraged investment techniques. The Subsidiaries otherwise are subject to the same general investment policies and restrictions as the Funds. Except as noted, references to the investment strategies of the Funds for non-equity securities include the investment strategies of the Subsidiaries.

The Subsidiaries are not registered under the 1940 Act. As an investor in its Subsidiary, each Fund, as the Subsidiary's sole shareholder, would not have the protections offered to investors in registered investment companies. However, because each Fund would wholly own and control its Subsidiary, and the Fund and Subsidiary would be managed by the Adviser, it is unlikely that the Subsidiary would take action contrary to the interests of the Fund or the Fund's shareholders. The Board has oversight responsibility for the investment activities of the Funds, including their investments in their respective Subsidiaries, and each Fund's role as the sole shareholder of its Subsidiary. Also, in managing a Subsidiary's portfolio, the Adviser would be subject to the same investment restrictions and operational guidelines that apply to the management of the Funds. Changes in the laws of the United States and/or the Cayman Islands, under which the Funds and the Subsidiaries are organized, respectively, could result in the inability of a Fund and/or a Subsidiary to operate as described in this SAI and could negatively affect a Fund and its shareholders.

In order for the Funds to qualify as RICs under the Code, a Fund must derive at least 90% of its gross income each taxable year from qualifying income, which is described in more detail in the Taxes section below. In September 2016, the Internal Revenue Service ("IRS") issued proposed regulations that would generally require the Subsidiaries to distribute their income each year in order for the Funds to treat that income as "qualifying income." The Funds have secured an opinion of counsel, based on customary representations that actual distributions made to the Funds should be treated as "qualifying income," which is consistent with the recently proposed IRS regulations. Accordingly, to the extent the Subsidiaries make distributions out of their earnings and profits, the Funds expect such distributions to be treated as qualifying income. The Adviser will carefully monitor the Funds' investments in the Subsidiaries to ensure that no more than 25% of the Funds' assets are invested in their respective Subsidiary to ensure compliance with the Funds' asset diversification test as described in more detail in the Taxes section.

Accordingly, the extent to which a Fund invests in certain derivatives through its Subsidiary may be limited by the qualifying income and asset diversification tests, which the Funds must continue to satisfy to maintain their status as RICs. As such, a Fund might cease to qualify as a RIC or could be required to reduce its

exposure to such investments, which may result in difficulty in implementing a Fund's investment strategy. If a Fund did not qualify as a RIC for any taxable year and certain relief provisions were not available, the Fund's taxable income would be subject to tax at the Fund level and to a further tax at the Fund shareholder level when such income is distributed by the Fund. Failure to comply with the requirements for qualification as a RIC would have significant negative tax consequences to Fund shareholders.

Borrowing

While the Funds do not anticipate doing so, each Fund may borrow money for investment purposes. Borrowing for investment purposes is one form of leverage. Leveraging investments, by purchasing securities with borrowed money, is a speculative technique that increases investment risk, but also increases investment opportunity. Because substantially all of each Fund's assets will fluctuate in value, whereas the interest obligations on borrowings may be fixed, the NAV per share of a Fund will increase more when the Fund's portfolio assets increase in value and decrease more when the Fund's portfolio assets decrease in value than would otherwise be the case. Moreover, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the returns on the borrowed funds. Under adverse conditions, the Funds might have to sell portfolio securities to meet interest or principal payments at a time when investment considerations would not favor such sales. The Funds may use leverage during periods when the Sub-Adviser believes that the Fund's investment objective would be furthered.

Each Fund may also borrow money to facilitate management of the Fund's portfolio by enabling the Fund to meet redemption requests when the liquidation of portfolio instruments would be inconvenient or disadvantageous. Such borrowing is not for investment purposes and will be repaid by the Fund promptly. As required by the Investment Company Act of 1940, as amended (the "1940 Act"), the Funds must maintain continuous asset coverage (total assets, including assets acquired with borrowed funds, less liabilities exclusive of borrowings) of 300% of all amounts borrowed. If, at any time, the value of a Fund's assets should fail to meet this 300% coverage test, the Fund, within three days (not including Sundays and holidays), will reduce the amount of the Fund's borrowings to the extent necessary to meet this 300% coverage requirement. Maintenance of this percentage limitation may result in the sale of portfolio securities at a time when investment considerations otherwise indicate that it would be disadvantageous to do so.

In addition to the foregoing, each Fund is authorized to borrow money as a temporary measure for extraordinary or emergency purposes in amounts not in excess of 5% of the value of the Fund's total assets. Borrowings for extraordinary or emergency purposes are not subject to the foregoing 300% asset coverage requirement.

Lending Portfolio Securities

Each Fund may lend portfolio securities to certain creditworthy borrowers. The borrowers provide collateral that is maintained in an amount at least equal to the current market value of the securities loaned. The Funds may terminate a loan at any time and obtain the return of the securities loaned. The Funds receive the value of any interest or cash or non-cash distributions paid on the loaned securities. Distributions received on loaned securities in lieu of dividend payments (*i.e.*, substitute payments) would not be considered qualified dividend income.

With respect to loans that are collateralized by cash, the borrower will be entitled to receive a fee based on the amount of cash collateral. The Funds are compensated by the difference between the amount earned on the reinvestment of cash collateral and the fee paid to the borrower. In the case of collateral other than cash, the Funds are compensated by a fee paid by the borrower equal to a percentage of the market value of the loaned securities. Any cash collateral may be reinvested in certain short-term instruments either directly on behalf of the lending Fund or through one or more joint accounts or money market funds, which may include those managed by the Sub-Adviser.

A Fund may pay a portion of the interest or fees earned from securities lending to a borrower as described above, and to one or more securities lending agents approved by the Board who administer the lending program for the Fund in accordance with guidelines approved by the Board. In such capacity, the lending agent causes the delivery of loaned securities from the Fund to borrowers, arranges for the return of loaned securities to the Fund at the termination of a loan, requests deposit of collateral, monitors the daily value of the loaned securities and collateral, requests that borrowers add to the collateral when required by the loan agreements, and provides recordkeeping and accounting services necessary for the operation of the program.

Securities lending involves exposure to certain risks, including operational risk (*i.e.*, the risk of losses resulting from problems in the settlement and accounting process), “gap” risk (*i.e.*, the risk of a mismatch between the return on cash collateral reinvestments and the fees a Fund has agreed to pay a borrower), and credit, legal, counterparty and market risk. In the event a borrower does not return a Fund’s securities as agreed, the Fund may experience losses if the proceeds received from liquidating the collateral do not at least equal the value of the loaned security at the time the collateral is liquidated plus the transaction costs incurred in purchasing replacement securities.

Pooled Investment Vehicles

The Funds may invest in the securities of pooled vehicles that are not investment companies and, thus, not required to comply with the provisions of the 1940 Act. As a shareholder of such pooled vehicles, the Funds will not have all of the investor protections afforded by the 1940 Act. Such pooled vehicles may, however, be required to comply with the provisions of other federal securities laws, such as the Securities Act of 1933. These pooled vehicles typically hold currency or commodities, such as gold or oil, or other property that is itself not a security. If a Fund invests in, and thus, is a shareholder of, a pooled vehicle, the Fund’s shareholders will indirectly bear the Fund’s proportionate share of the fees and expenses paid by the pooled vehicle, including any applicable management fees, in addition to both the management fees payable directly by the Fund to the Adviser and the other expenses that the Fund bears directly in connection with its own operations. In addition, a Fund’s investment in pooled investment vehicles may be considered illiquid and subject to the Fund’s restrictions on illiquid investments.

Certain pooled vehicles may be exchange-traded products (“ETPs”) that are not taxable as RICs. These non-RIC ETPs may produce non-qualifying income for purposes of the “90% Test” (as defined below), which must be met in order for the Funds to maintain their status as RICs under the Internal Revenue Code. If one or more of these non-RIC ETPs generates more non-qualifying income for purposes of the 90% Test than a Fund’s portfolio management expects, this non-qualifying income may be attributed to a Fund and could cause the Fund to inadvertently fail the 90% Test, thereby causing the Fund to inadvertently fail to qualify as a RIC under the Internal Revenue Code. Failure to comply with the requirements to qualify as a RIC would have significant negative tax consequences to Fund shareholders, including the imposition of a higher tax rate on the Fund and taxes on its distributions to shareholders, which would ultimately affect a shareholder’s return on its investment in the Fund.

Paired Class ETPs. The Funds may invest in ETPs that issue shares only in pairs of share classes (“Paired Class ETPs”). Paired Class ETPs are designed to provide exposure to measures of expected price volatility of a broad-based equity index, such as the S&P 500[®], as represented by the Paired Class ETP’s underlying index. Paired Class ETPs generally only hold cash; bills, bonds and notes issued and guaranteed by the United States Treasury with remaining maturities of three months or less; and overnight repurchase agreements collateralized by United States Treasury securities.

The structure of Paired Class ETPs differs significantly from that of more traditional ETPs. Each Paired Class ETP is designed to issue and redeem two share classes that trade separately on an exchange: “Up Shares” and “Down Shares.” The performance of each share class moves in opposite directions to the other.

Up Shares are positively linked to the Paired Class ETP's underlying index, while its Down Shares are negatively linked to the Paired Class ETP's underlying index. Each class of shares has its own value ("Class Value"), which is based on the Paired Class ETP's assets attributable to that class. As the performance of a Paired Class ETP's underlying index goes up or down, the amount of Fund assets attributed to each class also goes up or down, as applicable. For example, when the value of the underlying index increases, there is a corresponding increase in the Class Value of the Up Shares and a corresponding decrease in the Class Value of the Down Shares. Conversely, when the value of the underlying index decreases, the Class Value of the Down Shares increases and there is a corresponding decrease in the value of the Up Shares. At specified intervals, the Paired Class ETP engages in distributions of cash to the shares of the class whose Class Value has increased. Such distributions may not represent any income or gains and may represent a return of a shareholder's capital.

Investment in a Paired Class ETP involves significant risks. The receipt of distributions, in cash or in shares, will reduce an investor's opportunity for gain in subsequent periods. The payment of cash distributions over time is expected to cause a decline in the Paired Class ETP's Class Values, and the Paired Class ETP must offset payments of distributions in cash through creations to maintain its level of capitalization. Furthermore, payments made with respect to redemption orders, which will be made in cash, could accelerate this decline. If the Paired Class ETP's Class Values decline to a significant extent, the market for the Paired Class ETP's shares may become less liquid. A less liquid market for the Paired Class ETP's shares would increase the difficulty for an investor seeking to acquire or sell Paired Class ETP shares at a desirable price. An illiquid market would prevent an investor from buying or selling shares at any price. Moreover, a significant decline in the Paired Class ETP's Class Values may cause the sponsor to terminate the Paired Class ETP if its continued operation would be uneconomical. Such a liquidation may not occur at a time that is opportune or convenient to the Paired Class ETP's shareholders. In addition, there is no assurance that an investor, such as a Fund, will be able to execute purchases and sales at any consistent or desired trading price.

Repurchase Agreements

The Funds may enter into repurchase agreements with financial institutions, which may be deemed to be loans. The Funds follow certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions only with large, well-capitalized and well-established financial institutions whose condition will be continually monitored by the Sub-Adviser. In addition, the value of the collateral underlying the repurchase agreement will always be at least equal to the repurchase price, including any accrued interest earned on the repurchase agreement. In the event of a default or bankruptcy by a selling financial institution, the Funds will seek to liquidate such collateral. However, the exercising of a Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss. It is the current policy of each Fund not to invest in repurchase agreements that do not mature within seven days if any such investment, together with any other illiquid assets held by a Fund, amount to more than 15% of the Fund's net assets. The investments of a Fund in repurchase agreements, at times, may be substantial when, in the view of the Sub-Adviser, liquidity or other considerations so warrant.

Reverse Repurchase Agreements

Each Fund may enter into reverse repurchase agreements without limit as part of the Fund's investment strategy. However, each Fund does not expect to engage, under normal circumstances, in reverse repurchase agreements with respect to more than 33 1/3% of its assets. Reverse repurchase agreements involve sales by a Fund of portfolio assets concurrently with an agreement by the Fund to repurchase the same assets at a later date at a fixed price. Generally, the effect of such a transaction is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while the Fund will be able to keep the interest income associated with those portfolio securities. Such

transactions are advantageous only if the interest cost to a Fund of the reverse repurchase transaction is less than the cost of obtaining the cash otherwise. Opportunities to achieve this advantage may not always be available, and the Funds intend to use the reverse repurchase technique only when it will be advantageous to the Funds. Each Fund will establish a segregated account with the Trust's custodian bank in which the Fund will maintain cash, cash equivalents or other portfolio securities equal in value to the Fund's obligations in respect of reverse repurchase agreements. Such reverse repurchase agreements are not senior securities.

Short Sales

The Funds may engage in short sales transactions in which a Fund sells a security it does not own. To complete such a transaction, a Fund must borrow or otherwise obtain the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay to the lender amounts equal to any dividends or interest, which accrue during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The Fund may also use repurchase agreements to satisfy delivery obligations in short sales transactions. The proceeds of the short sale will be retained by the broker, to the extent necessary to meet the margin requirements, until the short position is closed out.

Until a Fund closes its short position or replaces the borrowed security, the Fund will: (a) maintain a segregated account containing cash or liquid securities at such a level that the amount deposited in the account plus the amount deposited with the broker as collateral will equal the current value of the security sold short; or (b) otherwise cover the Fund's short position. Each Fund may use up to 100% of its portfolio to engage in short sales transactions and collateralize its open short positions.

Swap Agreements

The Funds may enter into swap agreements, including, but not limited to, total return swaps, index swaps, and interest rate swaps. A Fund may utilize swap agreements in an attempt to gain exposure to the securities in a market without actually purchasing those securities, or to hedge a position. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a day to more than one-year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are calculated with respect to a "notional amount," *i.e.*, the return on or increase in value of a particular dollar amount invested in a "basket" of securities representing a particular index.

Forms of swap agreements include interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or "cap," interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified level, or "floor;" and interest rate collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels.

Most swap agreements entered into by the Funds will calculate the obligations of the parties to the agreement on a "net basis." Consequently, a Fund's obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). Other swap agreements may require initial premium (discount) payments as well as periodic payments (receipts) related to the interest leg of the swap or to the default of a reference obligation.

A Fund's obligations under a swap agreement will be accrued daily (offset against any amounts owing to the fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by segregating assets determined to be liquid. Obligations under swap agreements so covered will not be construed to be "senior securities" for purposes of a Fund's investment restriction concerning senior securities. Because they are two party contracts and because they may have terms of greater than seven days, swap agreements may be considered to be illiquid for a Fund's illiquid investment limitations. A Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty.

A Fund may enter into swap agreements to invest in a market without owning or taking physical custody of the underlying securities in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. The counterparty to any swap agreement will typically be a bank, investment banking firm or broker/dealer. The counterparty will generally agree to pay the Fund the amount, if any, by which the notional amount of the swap agreement would have increased in value had it been invested in the particular stocks, plus the dividends that would have been received on those stocks. The Fund will agree to pay to the counterparty a floating rate of interest on the notional amount of the swap agreement plus the amount, if any, by which the notional amount would have decreased in value had it been invested in such stocks. Therefore, the return to the Fund on any swap agreement should be the gain or loss on the notional amount plus dividends on the stocks less the interest paid by the Fund on the notional amount.

Swap agreements typically are settled on a net basis, which means that the two payment streams are netted out, with a Fund receiving or paying, as the case may be, only the net amount of the two payments. Payments may be made at the conclusion of a swap agreement or periodically during its term. Other swap agreements may require initial premium (discount) payments as well as periodic payments (receipts) related to the interest leg of the swap or to the default of a reference obligation. A Fund will generally earmark and reserve assets necessary to meet any accrued payment obligations when it is the buyer of a credit default swap.

Swap agreements generally do not involve the delivery of securities or other underlying assets. Accordingly, the risk of loss with respect to swap agreements is limited to the net amount of payments that a Fund is contractually obligated to make. If a swap counterparty defaults, a Fund's risk of loss consists of the net amount of payments a Fund is contractually entitled to receive, if any. The net amount of the excess, if any, of a Fund's obligations over its entitlements with respect to each equity swap will be accrued on a daily basis and an amount of cash or liquid assets, having an aggregate NAV at least equal to such accrued excess will be maintained in a segregated account by a custodian.

The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap documentation. As a result, the swap market has become relatively liquid in comparison with the markets for other similar instruments, which are traded in the OTC market.

The Dodd-Frank Wall Street Reform and Consumer Protection Act and related regulatory developments will ultimately require the clearing and exchange-trading of many OTC derivative instruments that the CFTC and SEC recently defined as "swaps." Mandatory exchange-trading and clearing will occur on a phased-in basis based on the type of market participant and CFTC approval of contracts for central clearing. The Adviser will continue to monitor developments in this area, particularly to the extent regulatory changes affect the Funds ability to enter into swap agreements.

The use of swap agreements is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If a counterparty's creditworthiness declines, the value of the swap would likely decline. Moreover, there is no guarantee that

a Fund could eliminate its exposure under an outstanding swap agreement by entering into an offsetting swap agreement with the same or another party.

U.S. Government Securities

Each Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as the Federal National Mortgage Association (“Fannie Mae”), the Federal Home Loan Mortgage Corporation (“Freddie Mac”), the Government National Mortgage Association (“Ginnie Mae”), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation (Farmer Mac).

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury. While the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

On September 7, 2008, the U.S. Treasury announced a federal takeover of Fannie Mae and Freddie Mac, placing the two federal instrumentalities in conservatorship. Under the takeover, the U.S. Treasury agreed to acquire \$1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality (the “Senior Preferred Stock Purchase Agreement” or “Agreement”). Under the Agreement, the U.S. Treasury pledged to provide up to \$200 billion per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. This was intended to ensure that the instrumentalities maintain a positive net worth and meet their financial obligations, preventing mandatory triggering of receivership. On December 24, 2009, the U.S. Treasury announced that it was amending the Agreement to allow the \$200 billion cap on the U.S. Treasury’s funding commitment to increase as necessary to accommodate any cumulative reduction in net worth over the next three years. As a result of this Agreement, the investments of holders, including the Funds, of mortgage-backed securities and other obligations issued by Fannie Mae and Freddie Mac are protected.

- **U.S. Treasury Obligations.** U.S. Treasury obligations consist of bills, notes and bonds issued by the U.S. Treasury and separately traded interest and principal component parts of such obligations that are transferable through the federal book-entry system known as Separately Traded Registered Interest and Principal Securities (“STRIPS”) and Treasury Receipts (“TRs”).

- **Receipts.** Interests in separately traded interest and principal component parts of U.S. government obligations that are issued by banks or brokerage firms and are created by depositing U.S. government obligations into a special account at a custodian bank. The custodian holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. TRs and STRIPS are interests in accounts sponsored by the U.S. Treasury. Receipts are sold as zero coupon securities.
- **U.S. Government Zero Coupon Securities.** STRIPS and receipts are sold as zero coupon securities, that is, fixed income securities that have been stripped of their unmatured interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturity but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturity and credit qualities.
- **U.S. Government Agencies.** Some obligations issued or guaranteed by agencies of the U.S. government are supported by the full faith and credit of the U.S. Treasury, others are supported by the right of the issuer to borrow from the U.S. Treasury, while still others are supported only by the credit of the instrumentality. Guarantees of principal by agencies or instrumentalities of the U.S. government may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of shares.

When-Issued and Delayed-Delivery Securities

Each Fund, from time to time, in the ordinary course of business, may purchase securities on a when-issued or delayed-delivery basis (*i.e.*, delivery and payment can take place between a month and 120 days after the date of the transaction). These securities are subject to market fluctuation and no interest accrues to the purchaser during this period. At the time a Fund makes the commitment to purchase securities on a when-issued or delayed-delivery basis, the Fund will record the transaction and thereafter reflect the value of the securities, each day, in determining the Fund's NAV. A Fund will not purchase securities on a when-issued or delayed-delivery basis if, as a result, more than 15% of the Fund's net assets would be so invested. At the time of delivery of the securities, the value of the securities may be more or less than the purchase price. The Fund will also establish a segregated account with its custodian bank in which the Fund will maintain cash or liquid securities equal to or greater in value than the Fund's purchase commitments for such when-issued or delayed-delivery securities. The Trust does not believe that a Fund's NAV or income will be adversely affected by the Fund's purchase of securities on a when-issued or delayed-delivery basis.

Zero Coupon Bonds

Each Fund may invest in U.S. Treasury zero-coupon bonds. These securities are U.S. Treasury bonds which have been stripped of their unmatured interest coupons, the coupons themselves, and receipts or certificates representing interests in such stripped debt obligations and coupons. Interest is not paid in cash during the term of these securities, but is accrued and paid at maturity. Such obligations have greater price volatility than coupon obligations and other normal interest-paying securities, and the value of zero coupon securities reacts more quickly to changes in interest rates than do coupon bonds. Because dividend income is accrued throughout the term of the zero coupon obligation, but is not actually received until maturity, the Funds may

have to sell other securities to pay said accrued dividends prior to maturity of the zero coupon obligation. Unlike regular U.S. Treasury bonds which pay semi-annual interest, U.S. Treasury zero coupon bonds do not generate semi-annual coupon payments. Instead, zero coupon bonds are purchased at a substantial discount from the maturity value of such securities, the discount reflecting the current value of the deferred interest; this discount is amortized as interest income over the life of the security, and is taxable even though there is no cash return until maturity. Zero coupon U.S. Treasury issues originally were created by government bond dealers who bought U.S. Treasury bonds and issued receipts representing an ownership interest in the interest coupons or in the principal portion of the bonds. Subsequently, the U.S. Treasury began directly issuing zero coupon bonds with the introduction of “Separate Trading of Registered Interest and Principal of Securities” (or “STRIPS”). While zero coupon bonds eliminate the reinvestment risk of regular coupon issues, that is, the risk of subsequently investing the periodic interest payments at a lower rate than that of the security held, zero coupon bonds fluctuate much more sharply than regular coupon-bearing bonds. Thus, when interest rates rise, the value of zero coupon bonds will decrease to a greater extent than will the value of regular bonds having the same interest rate.

WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES OR CBOE BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE. THERE ARE NO THIRD PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND LICENSEE, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

SPECIAL CONSIDERATIONS AND RISKS

A discussion of the risks associated with an investment in the Funds is contained in the Prospectus. The discussion below supplements, and should be read in conjunction with, the Prospectus.

General

Investment in a Fund should be made with an understanding that the value of a Fund's portfolio securities may fluctuate in accordance with changes in the financial condition of the issuers of the portfolio securities, the value of securities generally and other factors.

An investment in a Fund should also be made with an understanding of the risks inherent in an investment in securities, including the risk that the financial condition of issuers may become impaired or that the general condition of the securities markets may deteriorate (either of which may cause a decrease in the value of the portfolio securities and thus in the value of Shares). Securities are susceptible to general market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including expectations regarding government, economic, monetary and fiscal policies, inflation and interest rates, economic expansion or contraction, and global or regional political, economic and banking crises.

Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, have generally inferior rights to receive payments from the issuer in comparison with the rights of creditors of, or holders of debt obligations or preferred stocks issued by, the issuer. Further, unlike debt securities which typically have a stated principal amount payable at maturity (whose value, however, will be subject to market fluctuations prior thereto), or preferred stocks which typically have a liquidation preference and which may have stated optional or mandatory redemption provisions, common stocks have neither a fixed principal amount nor a maturity. Common stock values are subject to market fluctuations as long as the common stock remains outstanding.

Recent Market Circumstances

The financial crisis in the U.S. and global economies over the past several years, including the European sovereign debt crisis, has resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Liquidity in some markets has decreased and credit has become scarcer worldwide. Recent regulatory changes, including the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”) and the introduction of new international capital and liquidity requirements set forth by the Basel Committee on Banking Supervision (known as “Basel III”), may cause lending activity within the financial services sector to be constrained for several years as Basel III rules phase in and rules and regulations are promulgated and interpreted under the Dodd-Frank Act.

Since 2010, the risks of investing in certain foreign government debt have increased dramatically as a result of the ongoing European debt crisis, which began in Greece and has spread to varying degrees throughout various other European countries. These debt crises and the ongoing efforts of governments around the world to address these debt crises have also resulted in increased volatility and uncertainty in the global securities markets and it is impossible to predict the effects of these or similar events in the future on the Funds, though it is possible that these or similar events could have a significant adverse impact on the value and risk profile of the Funds.

In the United States, on August 5, 2011, S&P lowered its long-term sovereign credit rating on the U.S. federal government debt to “AA+” from “AAA.” Any additional downgrade by S&P, or any other rating agency, could increase volatility in both stock and bond markets, result in higher interest rates and higher Treasury yields and increase the costs of all kinds of debt.

Global economies and financial markets are also becoming increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact issuers in a different country or region. For example, in a referendum held on June 23, 2016, citizens of the United Kingdom voted to leave the European Union (“EU”), creating economic and political uncertainty in its wake. The country’s departure from the EU (known as “Brexit”) sparked depreciation in the value of the British pound, short-term declines in the stock markets and heightened risk of continued economic volatility worldwide.

As a consequence of the United Kingdom’s vote to withdraw from the EU, the government of the United Kingdom has, pursuant to the Treaty of Lisbon (the “Treaty”), given notice of its withdrawal and entered into negotiations with the EU Council to agree to terms for the United Kingdom’s withdrawal from the EU. The Treaty provides for a two-year negotiation period, which may be shortened or extended by agreement of the parties. However, there is still considerable uncertainty relating to the potential consequences and precise timeframe for the exit, how the negotiations for the withdrawal and new trade agreements will be conducted, and whether the United Kingdom’s exit will increase the likelihood of other countries also departing the EU. During this period of uncertainty, the negative impact on not only the United Kingdom and European economies, but the broader global economy, could be significant, potentially resulting in increased volatility and illiquidity and lower economic growth for companies that rely significantly on Europe for their business activities and revenues. Any further exits from the EU, or the possibility of such exits, would likely cause additional market disruption globally and introduce new legal and regulatory uncertainties.

The impact of these types of developments in the near- and long-term is unknown and could have additional adverse effects on economies, financial markets and asset valuations around the world.

Cyber Security

Investment companies, such as the Funds, and their service providers may be subject to operational and information security risks resulting from cyber attacks. Cyber attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber attacks affecting the Funds or the Adviser, Sub-Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact the Funds. For instance, cyber attacks may interfere with the processing of shareholder transactions, impact a Fund's ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject a Fund to regulatory fines or financial losses, and cause reputational damage. The Funds may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which the Funds invest, which could result in material adverse consequences for such issuers, and may cause a Fund's investment in such portfolio companies to lose value.

INVESTMENT RESTRICTIONS

The Trust has adopted the following investment restrictions as fundamental policies with respect to each Fund. These restrictions cannot be changed with respect to a Fund without the approval of the holders of a majority of the Fund's outstanding voting securities. For these purposes, a "majority of outstanding voting securities" means the vote of the lesser of: (1) 67% or more of the voting securities of a Fund present at the meeting if the holders of more than 50% of the Fund's outstanding voting securities are present or represented by proxy; or (2) more than 50% of the outstanding voting securities of a Fund.

Except with the approval of a majority of the outstanding voting securities, each Fund may not:

1. Borrow money, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
2. Purchase or sell commodities or commodity contracts unless acquired as a result of ownership of securities or other instruments issued by persons that purchase or sell commodities or commodities contracts; but this shall not prevent the Fund from purchasing, selling and entering into financial futures contracts (including, but not limited to, futures contracts on indices of securities, interest rates and currencies), options on financial futures contracts (including, but not limited to, futures contracts on indices of securities, interest rates and currencies), warrants, swaps, forward contracts, foreign currency spot and forward contracts or other derivative instruments that are not related to physical commodities.
3. Concentrate its investments in an industry or group of industries (i.e., hold 25% or more of its total assets in the securities of companies in a particular industry or group of industries). For purposes of this limitation, securities of the U.S. government (including its agencies and instrumentalities), repurchase agreements collateralized by U.S. government securities and securities of state or municipal governments and their political subdivisions are not considered to be issued by members of any industry.
4. Make loans, except as permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
5. Purchase or sell real estate, except that, to the extent permitted by applicable law, a Fund may (a) invest in securities or other instruments directly or indirectly secured by real estate, and (b) invest in securities or other instruments issued by issuers that invest in real estate.

6. Issue senior securities, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
7. Underwrite securities issued by others, except to the extent that a Fund may be considered an underwriter within the meaning of the Securities Act in the disposition of restricted securities or in connection with investments in other investment companies.

In addition to the investment objectives of the Funds, the investment limitations listed below are non-fundamental policies of the Funds and may be changed with respect to a Fund by the Board.

1. A Fund may not purchase or hold illiquid securities if, in the aggregate, more than 15% of its net assets would be invested in illiquid securities.
2. Under normal circumstances, the REX VolMAXX™ Long VIX Futures Strategy ETF will invest at least 80% of its net assets, plus any borrowings for investment purposes, in financial instruments that in combination provide exposure to VIX Futures Contracts.
3. Under normal circumstances, the REX VolMAXX™ Short VIX Futures Strategy ETF will invest at least 80% of its net assets, plus any borrowings for investment purposes, in financial instruments that in combination provide short exposure to VIX Futures Contracts.

If a percentage limitation is adhered to at the time of investment or contract, a later increase or decrease in percentage resulting from any change in value or total or net assets will not result in a violation of such restriction, except that the percentage limitations with respect to the borrowing of money and illiquid securities will be observed continuously. If the percentage of a Fund's net assets invested in illiquid securities exceeds 15% due to market activity or changes in the Fund's portfolio, the Fund will take appropriate measures to reduce its holdings of illiquid securities.

The following descriptions of certain provisions of the 1940 Act may assist investors in understanding the above policies and restrictions:

Concentration. The SEC has defined concentration as investing 25% or more of an investment company's total assets in an industry or group of industries, with certain exceptions.

Borrowing. The 1940 Act presently allows a fund to: (1) borrow from any bank (including pledging, mortgaging or hypothecating assets) in an amount up to 33 1/3% of its total assets, (2) borrow money for temporary purposes in an amount not exceeding 5% of the value of the fund's total assets at the time of the loan, and (3) enter into reverse repurchase agreements.

Senior Securities. Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain borrowings, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

Lending. Under the 1940 Act, a fund may only make loans if expressly permitted by its investment policies. Each Fund's current investment policy on lending is as follows: the Fund may not make loans except as permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.

Underwriting. Under the 1940 Act, underwriting securities involves a fund purchasing securities directly from an issuer for the purpose of selling (distributing) them or participating in any such activity either directly or indirectly.

Real Estate. The 1940 Act does not directly restrict an investment company's ability to invest in real estate, but does require that every investment company have a fundamental investment policy governing such investments. The Fund will not purchase or sell real estate, except that, to the extent permitted by applicable law, the Fund may (a) invest in securities or other instruments directly or indirectly secured by real estate, and (b) invest in securities or other instruments issued by issuers that invest in real estate.

Commodities. The 1940 Act does not directly restrict an investment company's ability to invest in commodities, but does require that every investment company have a fundamental investment policy governing such investments. Consistent with applicable law, each Fund may purchase or sell options, futures, forward contracts, or swaps, may invest in securities or other instruments backed by commodities, including physical commodities, and may invest in companies that are engaged in a commodities business or have a significant portion of their assets in commodities.

CONTINUOUS OFFERING

The method by which Creation Units are created and sold may raise certain issues under applicable securities laws. Because new Creation Units of shares are issued and sold by each Fund on an ongoing basis, at any point a "distribution," as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with SIDCO (the "Distributor"), breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters," but are effecting transactions in shares, whether or not participating in the distribution of shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with shares that are part of an over-allotment within the meaning of Section 4(a)(3) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus-delivery obligation with respect to shares of a Fund are reminded that, under Rule 153 of the Securities Act, a prospectus-delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that such Fund's prospectus is available on the SEC's electronic filing system. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in each Fund is contained in the Funds' Prospectus. The discussion below supplements, and should be read in conjunction with, the Fund's Prospectus.

Shares of the Funds are approved for listing and trading on the Exchange. The shares of the Funds will trade on the Exchange at prices that may differ to some degree from the Fund's NAV. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of shares will continue to be met.

The Exchange may, but is not required to, remove the shares of the fund from listing if: (1) following the initial twelve-month period beginning upon the commencement of trading of the fund, there are fewer than 50 beneficial holders of the shares for 30 or more consecutive trading days; (2) an interruption to the dissemination of the value of the intraday indicative value ("IIV") persists past the trading day in which it occurred or is no longer calculated or available or the disclosed portfolio is not made available to all market participants at the same time; (3) the Fund has failed to file any filings required by the SEC or the Exchange is aware that the Trust is not in compliance with the conditions of any exemptive order or no-action relief granted by the SEC to the Trust with respect to the fund; (4) if any of continued listing requirements set forth in the Exchange rules are not continuously maintained; (5) if the Exchange files separate proposals under Section 19(b) of the Securities Exchange Act of 1934 ("Exchange Act") and any of the statements or representations regarding the index composition, the description of the portfolio or reference assets, limitations on portfolio holdings or reference assets, dissemination and availability of index, reference asset, and IIV (as applicable), or the applicability of the Exchange listing rules specified in such proposals are not continuously met; (6) such other event shall occur or condition exists that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. In addition, the Exchange will remove the shares of the fund from listing and trading upon termination of the Trust or the fund.

The Exchange (or market data vendors or other information providers) will disseminate, every fifteen seconds during the regular trading day, an IIV relating to each Fund. The IIV calculations are estimates of the value of each Fund's NAV and are based on the sum of the estimated Cash Component (defined below) effective through and including the previous Business Day (defined below), plus the current market value of the Deposit Securities (defined below) required to be deposited in exchange for a Creation Unit. Premiums and discounts between the IIV and the market price may occur. The IIV does not necessarily reflect the precise composition of the current portfolio of securities held by a Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, it should not be viewed as a "real-time" update of the NAV of a Fund, which is calculated only once a day. In addition, the quotations of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. Neither the Funds, the Adviser, nor any of their affiliates are involved in, or responsible for, the calculation or dissemination of such IIVs and make no warranty as to their accuracy.

As in the case of other stocks traded on the Exchange, broker's commissions on purchases or sales of shares in market transactions will be based on negotiated commission rates at customary levels.

The Trust reserves the right to adjust the price levels of shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of a Fund.

The base and trading currencies of each Fund is the U.S. dollar. The base currency is the currency in which each Fund's NAV per share is calculated and the trading currency is the currency in which Shares of each Fund are listed and traded on the Exchange.

MANAGEMENT OF THE TRUST

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Fund Management.”

TRUSTEES AND OFFICERS OF THE TRUST

Board Responsibilities. The management and affairs of the Trust and its series, including the Funds, are overseen by the Board. The Board elects the officers of the Trust who are responsible for administering the day-to-day operations of the Trust and the Funds. The Board has approved contracts, as described below, under which certain companies provide essential services to the Trust.

Like most exchange-traded funds, the day-to-day business of the Trust, including the management of risk, is performed by third party service providers, such as the Adviser, the Sub-Adviser, the Distributor and administrator, SEI Investments Global Funds Services (the “Administrator”). The Trustees are responsible for overseeing the Trust’s service providers and, thus, have oversight responsibility with respect to risk management performed by those service providers. Risk management seeks to identify and address risks, *i.e.*, events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Funds. The Funds and their service providers employ a variety of processes, procedures and controls to identify various of those possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust’s business (*e.g.*, the Sub-Adviser is responsible for the day-to-day management of the Fund’s portfolio investments) and, consequently, for managing the risks associated with that business. The Board has emphasized to the Funds’ service providers the importance of maintaining vigorous risk management.

The Trustees’ role in risk oversight begins before the inception of the Funds, at which time certain of the Funds’ service providers present the Board with information concerning the investment objective, strategies and risks of the Funds as well as proposed investment limitations for the Funds. Additionally, the Adviser provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board continues its oversight function as various personnel, including the Trust’s Chief Compliance Officer, as well as personnel of the Sub-Adviser and other service providers such as the Funds’ independent accountants, make periodic reports to the Audit Committee or to the Board with respect to various aspects of risk management. The Board and the Audit Committee oversee efforts by management and service providers to manage risks to which the Funds may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the Funds by the Adviser and the Sub-Adviser and receives information about those services at its regular meetings. In addition, on an annual basis, in connection with its consideration of whether to renew the advisory and sub-advisory agreements with the Adviser and the Sub-Adviser, the Board meets with the Adviser and Sub-Adviser to review such services. Among other things, the Board regularly considers the Adviser’s and Sub-Adviser’s adherence to the Funds’ investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about the Funds’ performance and the Funds’ investments, including, for example, Top 10 portfolio holdings.

The Trust’s Chief Compliance Officer reports regularly to the Board to review and discuss compliance issues and Fund and Adviser risk assessments. At least annually, the Trust’s Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust’s policies and procedures and those of its service providers, including the Adviser and the Sub-Adviser. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; any material changes to the policies and procedures since the date of the last report; any recommendations for

material changes to the policies and procedures; and any material compliance matters since the date of the last report.

The Board receives reports from the Funds' service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. The Board has also established a Fair Value Committee that is responsible for implementing the Trust's Fair Value Procedures and providing reports to the Board concerning investments for which market quotations are not readily available. Annually, the independent registered public accounting firm reviews with the Audit Committee its audit of each Fund's financial statements, focusing on major areas of risk encountered by each Fund and noting any significant deficiencies or material weaknesses in each Fund's internal controls. Additionally, in connection with its oversight function, the Board oversees Fund management's implementation of disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized, and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their review of these reports and discussions with the Adviser, the Sub-Adviser, the Chief Compliance Officer, the independent registered public accounting firm and other service providers, the Board and the Audit Committee learn in detail about the material risks of the Funds, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the Funds can be identified and/or quantified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Funds' goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. Most of the Funds' investment management and business affairs are carried out by or through the Adviser and other service providers each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from a Fund's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's ability to monitor and manage risk, as a practical matter, is subject to limitations.

Members of the Board. There are five members of the Board, four of whom are not interested persons of the Trust, as that term is defined in the 1940 Act (the "independent Trustees"). J. Garrett Stevens, the sole interested Trustee, serves as Chairman of the Board. The Trust does not have a lead independent trustee. The Board is comprised of a super-majority (*i.e.*, 67 percent or more) of independent Trustees. The Trust has determined its leadership structure is appropriate given the specific characteristics and circumstances of the Trust. The Trust made this determination in consideration of, among other things, the fact that the independent Trustees of the Funds constitute a super-majority of the Board, the number of independent Trustees that constitute the Board, the amount of assets under management in the Trust, and the number of funds overseen by the Board. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the independent Trustees from Fund management.

The Board has two standing committees: the Audit Committee and the Governance and Nominating Committee (as described below). The Audit Committee and Governance and Nominating Committee are chaired by an independent Trustee and composed of independent Trustees.

Set forth below are the names, years of birth, positions with the Trust, lengths of term of office, and principal occupations and other directorships held during the last five years by each of the persons currently serving

as a Trustee of the Trust. The address of each Trustee of the Trust is c/o Exchange Traded Concepts Trust, 10900 Hefner Pointe Drive, Suite 207, Oklahoma City, Oklahoma 73120.

Name and Year of Birth	Position(s) Held with the Trust	Term of Office ⁽¹⁾ and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen By Trustee	Other Directorships held by Trustee During Past 5 Years

⁽¹⁾ Each Trustee shall serve during the continued life of the Trust until he or she dies, resigns, is declared bankrupt or incompetent by a court of competent jurisdiction, or is removed.

Individual Trustee Qualifications. The Trust has concluded that each of the Trustees should serve on the Board because of their ability to review and understand information about the Funds provided to them by management, to identify and request other information they may deem relevant to the performance of their duties, to question management and other service providers regarding material factors bearing on the management and administration of the Funds, and to exercise their business judgment in a manner that serves the best interests of each Fund’s shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on their own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Stevens should serve as Trustee because of the experience he gained in his roles with registered broker-dealer and investment management firms, as Chief Executive Officer of the Adviser, his experience in and knowledge of the financial services industry, and the experience he has gained as serving as Trustee of the Trust since 2009.

The Trust has concluded that Mr. Jacoby should serve as a Trustee because of the experience he has gained from over 25 years in or serving the investment management industry. Until his retirement in June 2014, Mr. Jacoby served as a partner at the audit and professional services firm Deloitte & Touche LLP, where he had worked since 2000, providing various services to asset management firms that manage mutual funds, hedge

funds and private equity funds. Prior to that, Mr. Jacoby held various senior positions at financial services firms. Additionally, he served as a partner at Ernst & Young LLP. Mr. Jacoby is a Certified Public Accountant.

The Trust has concluded that Mr. Mahle should serve as Trustee because of the experience he has gained as an attorney in the investment management industry of a major law firm, representing exchange-traded funds and other investment companies as well as their sponsors and advisers and his knowledge and experience in investment management law and the financial services industry. Mr. Mahle is also a professor of law at Fordham Law School, where he lectures on investment companies and investment adviser regulations.

The Trust has concluded that Mr. Wolfgruber should serve as a Trustee because of his experience as President and Chief Investment Officer of Oppenheimer Funds, Inc. where he was employed from 2000 to 2009. Mr. Wolfgruber was responsible for the oversight of sales, marketing, trading, risk management and the investment process of ten investment teams which, together, managed over \$200 billion across domestic and international asset classes. Mr. Wolfgruber has been involved in investment management for over 35 years with previous experience as a research analyst, portfolio manager and team and business leader at JP Morgan Investment Management from 1974 to 2000. He is a Chartered Financial Analyst.

The Trust has concluded that Mr. Zurack should serve as a Trustee because of the experience he has gained serving in various leadership roles in the equity derivatives groups of a large financial institution, his experience in teaching equity derivatives at the graduate level, as well as his knowledge of the financial services industry.

In its periodic assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the funds.

Set forth below are the names, years of birth, positions with the Trust, lengths and term of office, and principal occupations held during the last five years by each of the persons currently serving as officers of the Trust. The address of J. Garrett Stevens, Richard Hogan, and James J. Baker Jr. is c/o Exchange Traded Concepts Trust, 10900 Hefner Pointe Drive, Suite 207, Oklahoma City, Oklahoma 73120, the address of Eric Kleinschmidt is SEI Investments Company, One Freedom Valley Drive, Oaks, Pennsylvania 19456, and the address of Alyssa Garie is Cipperman Compliance Services, 480 E. Swedesford Road, Suite 300, Wayne, PA 19087.

⁽¹⁾Each Officer serves at the pleasure of the Board of Trustees.

Compensation of the Trustees

The following table sets forth the fees paid to the Trustees for the fiscal year ended November 30, 2017. Independent Trustee fees are paid from the unitary fee paid to the Adviser by the Fund. Trustee compensation does not include reimbursed out-of-pocket expenses in connection with attendance at meetings.

Name	Aggregate Compensation¹	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from the Trust and Fund Complex²
<u>Interested Trustee</u>				
Stevens	\$0	n/a	n/a	\$0 for service on (1) board
<u>Independent Trustees</u>				
Jacoby	\$51,500	n/a	n/a	\$103,300 for service on (2) boards
Wolfgruber	\$46,500	n/a	n/a	\$93,000 for service on (2) boards
Mahle	\$46,500	n/a	n/a	\$93,000 for service on (2) boards
Zurack	\$50,000	n/a	n/a	\$50,000 for service on (1) board

1 For the fiscal year ended November 30, 2017, as compensation for service on the Trust's Board, the Trustees were entitled to receive a \$35,000 annual base fee, as well as a \$2,500 fee for each in-person meeting and a \$1,000 fee for each telephonic meeting. In addition, Mr. Jacoby received a \$5,000 annual fee for his service as Audit Committee chair.

2 For the fiscal year ended November 30, 2017, for their service on the Board of Trustees of Exchange Listed Funds Trust in the Fund Complex, Mr. Jacoby, Mr. Wolfgruber and Mr. Mahle each received a \$35,000 annual base fee, as well as a \$2,500 fee for each in-person meeting (or, if both Trusts in the Fund complex met, \$4,000 per day, whichever is lower), and a \$1,000 fee for each telephonic meeting. In addition, Mr. Jacoby received a \$5,000 annual fee for his service as Audit Committee chair.

Board Committees

The Board has established the following standing committees:

Audit Committee. The Board has a standing Audit Committee that is composed of each of the independent Trustees of the Trust. The Audit Committee operates under a written charter approved by the Board. The principal responsibilities of the Audit Committee include: recommending which firm to engage as the Fund's independent registered public accounting firm and whether to terminate this relationship; reviewing the independent registered public accounting firm's compensation, the proposed scope and terms of its engagement, and the firm's independence; pre-approving audit and non-audit services provided by the Fund's independent registered public accounting firm to the Trust and certain other affiliated entities; serving as a channel of communication between the independent registered public accounting firm and the Trustees; reviewing the results of each external audit, including any qualifications in the independent registered public accounting firm's opinion, any related management letter, management's responses to recommendations made by the independent registered public accounting firm in connection with the audit, reports submitted to the Committee by the internal auditing department of the Trust's administrator that are material to the Trust as a whole, if any, and management's responses to any such reports; reviewing the Fund's audited financial statements and considering any significant disputes between the Trust's management and the independent registered public accounting firm that arose in connection with the preparation of those financial statements; considering, in consultation with the independent registered public accounting firm and the Trust's senior internal accounting executive, if any, the independent registered public accounting firms' report on the adequacy of the Trust's internal financial controls; reviewing, in consultation with the Fund's independent registered public accounting firm, major changes regarding auditing and accounting principles and practices to be followed when preparing the Fund's financial statements; and other audit related matters. The Audit Committee meets periodically, as necessary, and four (4) times during the most recently completed fiscal year.

Governance and Nominating Committee. The Board has a standing Governance and Nominating Committee that is composed of each of the independent Trustees of the Trust. The Governance and Nominating Committee operates under a written charter approved by the Board. The principal responsibility of the Governance and Nominating Committee is to consider, recommend and nominate candidates to fill vacancies on the Trust's Board, if any. The Governance and Nominating Committee generally will not consider nominees recommended by shareholders. The Governance and Nominating Committee meets periodically, as necessary, and met one (1) time during the most recently completed fiscal year.

Fair Value Committee. In addition to the Board's standing committees described above, the Board also has established a Fair Value Committee that is composed of certain officers of the Trust and representatives from the Adviser and the Trust's administrator. The Fair Value Committee operates under procedures approved by the Board. The Fair Value Committee is responsible for the valuation of any portfolio investments for which market quotations or prices are not readily available. The Fair Value Committee meets periodically, as necessary.

Ownership of Fund Shares

The following table shows the dollar amount ranges of each Trustee's "beneficial ownership" of shares of the Fund and each other series of the Trust as of the end of the most recently completed calendar year. Dollar amount ranges disclosed are established by the SEC. "Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act. As of the date of this SAI, the Trustees and officers own less than 1% of the outstanding shares of the Trust.

Name	Dollar Range of Shares Owned in the Fund	Aggregate Dollar Range of Fund Shares (Owned in All Funds in the Fund Complex) ¹
<u>Interested Trustee</u>		
J. Garrett Stevens	None	None
<u>Independent Trustees</u>		
Timothy J. Jacoby	None	None
David M. Mahle	None	None
Kurt Wolfgruber	None	None
Mark A. Zurack	None	None

¹ Valuation date is December 31, 2017.

CODES OF ETHICS

The Trust, the Adviser, the Sub-Adviser and the Distributor have each adopted a code of ethics pursuant to Rule 17j-1 of the 1940 Act. These Codes of Ethics are designed to prevent affiliated persons of the Trust, the Adviser, the Sub-Adviser and the Distributor from engaging in deceptive, manipulative or fraudulent activities in connection with securities held or to be acquired by the Fund (which may also be held by persons subject to the Codes of Ethics).

There can be no assurance that the Codes of Ethics will be effective in preventing such activities. Each Code of Ethics, filed as exhibits to this registration statement, may be examined at the office of the SEC in Washington, D.C. or on the Internet at the SEC's website at www.sec.gov.

PROXY VOTING

The Board has delegated the responsibility to vote proxies for securities held in each Fund's portfolio to the Adviser. Proxies for the portfolio securities are voted in accordance with the Adviser's proxy voting guidelines, which are set forth in Exhibit A to this SAI. Information regarding how the Funds voted proxies relating to its portfolio securities during the most recent twelve-month period ended June 30 will be available: (1) without charge by calling 1-844-REX-1414 (1-844-739-1414); (2) on the Funds' website at www.volmaxx.com; and (3) on the SEC's website at www.sec.gov.

INVESTMENT ADVISORY AND OTHER SERVICES

Adviser. Exchange Traded Concepts, LLC, an Oklahoma limited liability company located at 10900 Hefner Pointe Drive, Suite 207, Oklahoma City, Oklahoma 73120, serves as the investment adviser to the Fund. The Adviser is majority owned by Cottonwood ETF Holdings LLC.

The Trust and the Adviser have entered into an investment advisory agreement (the "Advisory Agreement"), with respect to the Funds. Under the Advisory Agreement, the Adviser provides investment advice to the Funds primarily in the form of oversight of the Sub-Adviser, including daily monitoring of the purchase and sale of securities of the Sub-Adviser and regular review of the Sub-Adviser's performance. The Adviser, in consultation with the Sub-Adviser, arranges for transfer agency, custody, fund administration and accounting, and other non-distribution related services necessary for the Funds to operate. The Adviser administers the Funds' business affairs, provides office facilities and equipment and certain clerical, bookkeeping and administrative services, and provides its officers and employees to serve as officers or Trustees of the Trust.

For the services the Adviser provides, each Fund pays the Adviser a fee, which is calculated daily and paid monthly, as follows:

REX VolMAXX™ Long VIX Futures Strategy ETF	1.25%
REX VolMAXX™ Short VIX Futures Strategy ETF	1.45%

The table below shows the management fees earned by the Adviser for the period indicated.

	Fiscal Period May 3, 2016 ¹ through March 31, 2017	Fiscal Period April 1, 2017 through November 30, 2017
REX VolMAXX™ Long VIX Futures Strategy ETF	\$31,819	\$20,900
REX VolMAXX™ Short VIX Futures Strategy ETF	\$64,783	\$154,772

¹ Commencement of operations.

Under the Advisory Agreement, the Adviser has agreed to pay all expenses incurred by the Trust except for the advisory fee, interest, taxes, brokerage commissions and other expenses incurred in placing orders or settlement of orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act (the “Excluded Expenses”).

After the initial two-year term, the continuance of the Advisory Agreement must be specifically approved at least annually: (i) by the vote of the Trustees or by a vote of the shareholders of each Fund; and (ii) by the vote of a majority of the Trustees who are not parties to the Advisory Agreement or “interested persons” or of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement will terminate automatically in the event of its assignment, and is terminable at any time without penalty by the Trustees of the Trust or, with respect to a Fund, by a majority of the outstanding voting securities of the Fund, or by the Adviser on not more than sixty (60) days’ nor less than thirty (30) days’ written notice to the Trust. As used in the Advisory Agreement, the terms “majority of the outstanding voting securities,” “interested persons” and “assignment” have the same meaning as such terms in the 1940 Act.

Each Subsidiary is managed by the Adviser pursuant to the Subsidiary Agreement, under which agreement each Subsidiary pays the Adviser the Subsidiary Management Fee. The Adviser has contractually agreed to waive the management fee it receives from a Fund in an amount equal to the Subsidiary Management Fee, if any, paid to the Adviser by such Fund’s Subsidiary. For the fiscal period ended March 31, 2017, each Subsidiary’s Subsidiary Management Fee was \$0. For the fiscal period ended November 30, 2017, each Subsidiary’s Subsidiary Management Fee was \$0. The Adviser, and not the Funds or their respective Subsidiaries, pays the Sub-Adviser’s fees.

The Trust and the Adviser have obtained exemptive relief, *In the Matter of Exchange Traded Concepts Trust, et al.*, Investment Company Act Release Nos. 31453 (February 10, 2015) (Notice) and 31502 (March 10, 2015) (the “Order”), pursuant to which the Adviser may, with Board approval but without shareholder approval, change or select new sub-advisers, materially amend the terms of an agreement with a sub-adviser (including an increase in its fee), or continue the employment of a sub-adviser after an event that would

otherwise cause the automatic termination of services, subject to the conditions of the Order. Shareholders will be notified of any sub-adviser changes.

Sub-Adviser. The Adviser has retained Vident Investment Advisory, LLC, 300 Colonial Center Parkway, Suite 330, Roswell, Georgia 30076, to serve as sub-adviser to the Funds. The Sub-Adviser is a wholly-owned subsidiary of Vident Financial, LLC. Vident Financial, LLC is a wholly-owned subsidiary of the Vident Investors' Oversight Trust. Andrew T. Schmuhl and Vince L. Birley serve as the trustees of the Vident Investors' Oversight Trust. Under a sub-advisory agreement between the Adviser and the Sub-Adviser (the "Sub-Advisory Agreement"), the Sub-Adviser is responsible for trading portfolio securities on behalf of each Fund, including selecting broker dealers to execute purchase and sale transactions as instructed by the Adviser, subject to the supervision of the Adviser and the Board of Trustees. Under the Sub-Advisory Agreement, the Adviser pays the Sub-Adviser a fee, calculated daily and paid monthly, at an annual rate as follows:

REX VolMAXX™ Long VIX Futures Strategy ETF	0.05% on up to \$250 million in assets; 0.04% on the next \$250 million; 0.03% on amounts over \$500 million; subject to a \$30,000 annual minimum fee.
REX VolMAXX™ Short VIX Futures Strategy ETF	0.05% on up to \$250 million in assets; 0.04% on the next \$250 million; 0.03% on amounts over \$500 million; subject to a \$30,000 annual minimum fee.

The table below shows the management fees earned by the Sub-Adviser for the period indicated.

	Fiscal Period May 3, 2016 ¹ through March 31, 2017	Fiscal Period April 1, 2017 through November 30, 2017
REX VolMAXX™ Long VIX Futures Strategy ETF	\$27,295	\$20,041
REX VolMAXX™ Short VIX Futures Strategy ETF	\$27,295	\$20,041

¹ Commencement of operations.

After the initial two-year term, the continuance of the Sub-Advisory Agreement must be specifically approved at least annually: (i) by the vote of the Trustees or by a vote of the shareholders of the Funds; and (ii) by the vote of a majority of the Trustees who are not parties to the Sub-Advisory Agreement or "interested persons" or of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. The Sub-Advisory Agreement will terminate automatically in the event of its assignment, and is terminable at any time without penalty by the Trustees of the Trust or, with respect to the Funds, by a majority of the outstanding voting securities of the Funds. The Sub-Advisory Agreement also may be terminated by the Adviser upon sixty (60) days' written notice to the Sub-Adviser and by the Sub-Adviser upon sixty (60) day's written notice to the Adviser and the Board. As used in the Sub-Advisory Agreement, the terms "majority of the outstanding voting securities," "interested persons" and "assignment" have the same meaning as such terms in the 1940 Act.

THE PORTFOLIO MANAGER

Ms. Denise Krisko (the “Portfolio Manager”) serves as portfolio manager of the Funds. This section includes information about the Portfolio Manager, including information about other accounts the Portfolio Manager manages and the Portfolio Manager’s compensation.

Compensation. The Portfolio Manager is compensated by the Sub-Adviser and does not receive any compensation directly from the Fund or the Adviser. The Portfolio Manager receives a base salary and is eligible to earn discretionary bonuses from time to time. The availability and amount of any bonus will be based on factors such as the Sub-Adviser’s profitability, the Portfolio Manager’s individual performance and team contribution.

Shares Owned by Portfolio Manager. The Fund is required to show the dollar range of the Portfolio Manager’s “beneficial ownership” of shares of the Fund as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. “Beneficial ownership” is determined in accordance with Rule 16a-1(a)(2) under the Exchange Act. As of the date of this SAI, the Portfolio Manager beneficially owned no shares of either Fund.

Other Accounts Managed by the Portfolio Manager. In addition to the Funds, the Portfolio Manager is responsible for the day-to-day management of certain other accounts, as follows:

Name	Registered Investment Companies*		Other Pooled Investment Vehicles*		Other Accounts*	
	Number of Accounts	Total Assets (\$ millions)	Number of Accounts	Total Assets (\$ millions)	Number of Accounts	Total Assets (\$ millions)
Denise M. Krisko	30	\$4,751	1	\$16	0	\$0

* Information provided is as of November 30, 2017. None of the accounts managed by the Portfolio Manager are subject to performance based advisory fees.

Conflicts of Interest. The Portfolio Manager’s management of “other accounts” may give rise to potential conflicts of interest in connection with the management of a Fund’s investments, on the one hand, and the investments of the Portfolio Manager’s other accounts, on the other. The other accounts may have the same investment objectives as a Fund. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby the Portfolio Manager could favor one account over another. Another potential conflict could include the Portfolio Manager’s knowledge about the size, timing, and possible market impact of Fund trades, whereby the Portfolio Manager could use this information to the advantage of other accounts and to the disadvantage of a Fund. However, the Sub-Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts managed by the Portfolio Manager are fairly and equitably allocated.

THE DISTRIBUTOR

The Trust and SEI Investments Distribution Co. (the “Distributor”), a wholly-owned subsidiary of SEI Investments Company (“SEI Investments”), and an affiliate of the Administrator, are parties to an distribution agreement dated November 10, 2011 (the “Distribution Agreement”), whereby the Distributor acts as principal underwriter for the Trust and distributes shares of the Funds. Shares are continuously offered for sale by the Distributor only in Creation Units. Each Creation Unit is made up of at least 50,000

shares. The Distributor will not distribute shares in amounts less than a Creation Unit. The principal business address of the Distributor is One Freedom Valley Drive, Oaks, Pennsylvania 19456.

Under the Distribution Agreement, the Distributor, as agent for the Trust, will solicit orders for the purchase of shares, provided that any subscriptions and orders will not be binding on the Trust until accepted by the Trust. The Distributor will deliver prospectuses and, upon request, Statements of Additional Information to persons purchasing Creation Units and will maintain records of orders placed with it. The Distributor is a broker-dealer registered under the Exchange Act and a member of the Financial Industry Regulatory Authority (“FINRA”).

The Distributor may also enter into agreements with securities dealers (“Soliciting Dealers”) who will solicit purchases of Creation Units of shares. Such Soliciting Dealers may also be Authorized Participants (as discussed in “Procedures for Creation of Creation Units” below) or DTC participants (as defined below).

The Distribution Agreement will continue for two years from its effective date and is renewable thereafter. The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the shareholders of the Fund and (ii) by the vote of a majority of the Trustees who are not “interested persons” of the Trust and have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement is terminable without penalty by the Trust on 60 days’ written notice when authorized either by majority vote of a Fund’s outstanding voting shares or by a vote of a majority of its Board (including a majority of the Independent Trustees), or by the Distributor on 60 days’ written notice, and will automatically terminate in the event of its assignment.

The Distributor may also provide trade order processing services pursuant to a services agreement.

Distribution and Service Plan. The Trust has adopted a Distribution and Service Plan (the “Plan”) in accordance with the provisions of Rule 12b-1 under the 1940 Act, which regulates circumstances under which an investment company may directly or indirectly bear expenses relating to the distribution of its shares. No payments pursuant to the Plan will be made during the twelve (12) month period from the date of this SAI. Continuance of the Plan must be approved annually by a majority of the Trustees of the Trust and by a majority of the Trustees who are not interested persons (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the Plan or in any agreements related to the Plan (“Qualified Trustees”). The Plan requires that quarterly written reports of amounts spent under the Plan and the purposes of such expenditures be furnished to and reviewed by the Trustees. The Plan may not be amended to increase materially the amount that may be spent thereunder without approval by a majority of the outstanding shares of any class of a Fund that is affected by such increase. All material amendments of the Plan will require approval by a majority of the Trustees of the Trust and of the Qualified Trustees.

The Plan provides that each Fund pays the Distributor an annual fee of up to a maximum of 0.25% of the average daily net assets of the shares. Under the Plan, the Distributor may make payments pursuant to written agreements to financial institutions and intermediaries such as banks, savings and loan associations and insurance companies including, without limit, investment counselors, broker-dealers and the Distributor’s affiliates and subsidiaries (collectively, “Agents”) as compensation for services and reimbursement of expenses incurred in connection with distribution assistance. The Plan is characterized as a compensation plan since the distribution fee will be paid to the Distributor without regard to the distribution expenses incurred by the Distributor or the amount of payments made to other financial institutions and intermediaries. The Trust intends to operate the Plan in accordance with its terms and with FINRA rules concerning sales charges.

Under the Plan, subject to the limitations of applicable law and regulations, each Fund is authorized to compensate the Distributor up to the maximum amount to finance any activity primarily intended to result in the sale of Creation Units of a Fund or for providing or arranging for others to provide shareholder services and for the maintenance of shareholder accounts. Such activities may include, but are not limited to: (i) delivering copies of a Fund's then current reports, prospectuses, notices, and similar materials, to prospective purchasers of Creation Units; (ii) marketing and promotional services, including advertising; (iii) paying the costs of and compensating others, including Authorized Participants with whom the Distributor has entered into written Authorized Participant Agreements, for performing shareholder servicing on behalf of a Fund; (iv) compensating certain Authorized Participants for providing assistance in distributing the Creation Units of a Fund, including the travel and communication expenses and salaries and/or commissions of sales personnel in connection with the distribution of the Creation Units of a Fund; (v) payments to financial institutions and intermediaries such as banks, savings and loan associations, insurance companies and investment counselors, broker-dealers, mutual fund supermarkets and the affiliates and subsidiaries of the Trust's service providers as compensation for services or reimbursement of expenses incurred in connection with distribution assistance; (vi) facilitating communications with beneficial owners of shares, including the cost of providing (or paying others to provide) services to beneficial owners of shares, including, but not limited to, assistance in answering inquiries related to Shareholder accounts, and (vi) such other services and obligations as are set forth in the Distribution Agreement.

THE ADMINISTRATOR

SEI Investments Global Funds Services (the "Administrator"), a Delaware statutory trust with its principal business offices at One Freedom Valley Drive, Oaks, Pennsylvania 19456, serves as administrator of the Trust and the Funds. SEI Investments Management Corporation ("SIMC"), a wholly-owned subsidiary of SEI Investments, is the owner of all beneficial interest in the Administrator. SEI Investments and its subsidiaries and affiliates, including the Administrator, are leading providers of funds evaluation services, trust accounting systems, and brokerage and information services to financial institutions, institutional investors, and money managers. The Administrator and its affiliates also serve as administrator or sub-administrator to other exchange-traded funds and mutual funds.

The Trust and the Administrator have entered into an administration agreement dated November 10, 2011 (the "Administration Agreement"). Under the Administration Agreement, the Administrator provides the Trust with administrative services, including regulatory reporting and all necessary office space, equipment, personnel and facilities. Pursuant to a schedule to the Administration Agreement, the Administrator also serves as the shareholder servicing agent for the Funds whereby the Administrator provides certain shareholder services to the Funds.

For its services under the Administration Agreement, the Administrator is entitled to a fee, based on assets under management, subject to a minimum fee.

THE CUSTODIAN

Brown Brothers Harriman & Co. (the "Custodian"), located at 50 Post Office Square, Boston, Massachusetts 02110, serves as the custodian of the Funds. The Custodian holds cash, securities and other assets of the Funds as required by the 1940 Act. The Custodian also serves as custodian to the Subsidiaries.

THE TRANSFER AGENT

Brown Brothers Harriman & Co., located at 50 Post Office Square, Boston, Massachusetts 02110, serves as the Funds' transfer agent and dividend disbursing agent under a transfer agency agreement with the Trust.

LEGAL COUNSEL

Morgan, Lewis & Bockius LLP, located at 1111 Pennsylvania Avenue NW, Washington, DC 20004, serves as legal counsel to the Trust.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Cohen & Company, Ltd., located at 1350 Euclid Avenue, Suite 800, Cleveland, Ohio, serves as the independent registered public accounting firm for the Funds.

PORTFOLIO HOLDINGS DISCLOSURE POLICIES AND PROCEDURES

The Board has approved portfolio holdings disclosure policies that govern the timing and circumstances of disclosure to shareholders and third parties of information regarding the portfolio investments held by the Funds. These policies and procedures, as described below, are designed to ensure that disclosure of portfolio holdings is in the best interests of Fund shareholders, and address conflicts of interest between the interests of Fund shareholders and those of the Funds' Adviser, Sub-Adviser, Distributor, or any affiliated person of the Funds, the Adviser, Sub-Adviser, or the Distributor.

The Trust's Board has adopted a policy regarding the disclosure of information about the Funds' security holdings. Each Fund's entire portfolio holdings are publicly disseminated each day the Funds are open for business through financial reporting and news services including publicly available internet web sites. In addition, the composition of the In-Kind Creation Basket and the In-Kind Redemption Basket, is publicly disseminated daily prior to the opening of the Exchange via the NSCC.

DESCRIPTION OF SHARES

The Declaration of Trust authorizes the issuance of an unlimited number of funds and shares of each fund. Each share of a fund represents an equal proportionate interest in that fund with each other share. Shares are entitled upon liquidation to a pro rata share in the net assets of the fund. Shareholders have no preemptive rights. The Declaration of Trust provides that the Trustees of the Trust may create additional series or classes of shares. All consideration received by the Trust for shares of any additional funds and all assets in which such consideration is invested would belong to that fund and would be subject to the liabilities related thereto. Share certificates representing shares will not be issued. The Fund's Shares, when issued, are fully paid and non-assessable.

Each share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder. Shareholders receive one vote for every full Fund share owned. The Fund will vote separately on matters relating solely to the Fund. All shares of the Fund are freely transferable.

As a Delaware statutory trust, the Trust is not required to hold annual shareholder meetings unless otherwise required by the 1940 Act. However, a meeting may be called by the Board on the written request of shareholders owning at least 10% of the outstanding shares of the Trust entitled to vote. If a meeting is requested by shareholders, the Trust will provide appropriate assistance and information to the shareholders who requested the meeting. Shareholder inquiries can be made by calling 1-844-REX-1414 or by writing to the Fund at the following address: c/o Exchange Traded Concepts Trust, 10900 Hefner Pointe Drive, Suite 207, Oklahoma City, Oklahoma 73120.

Under the Declaration of Trust, the Trustees have the power to liquidate the Fund without shareholder approval. While the Trustees have no present intention of exercising this power, they may do so if the Fund

fails to reach a viable size within a reasonable amount of time or for such other reasons as may be determined by the Board.

LIMITATION OF TRUSTEES' LIABILITY

The Declaration of Trust provides that a Trustee shall be liable only for his or her own willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee, and shall not be liable for errors of judgment or mistakes of fact or law. The Trustees shall not be responsible or liable in any event for any neglect or wrong-doing of any officer, agent, employee, investment adviser or principal underwriter of the Trust, nor shall any Trustee be responsible for the act or omission of any other Trustee. The Declaration of Trust also provides that the Trust shall indemnify each person who is, or has been, a Trustee, officer, employee or agent of the Trust, any person who is serving or has served at the Trust's request as a Trustee, officer, trustee, employee or agent of another organization in which the Trust has any interest as a shareholder, creditor or otherwise to the extent and in the manner provided in the By-Laws. However, nothing in the Declaration of Trust shall protect or indemnify a Trustee against any liability for his or her willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee. Nothing contained in this section attempts to disclaim a Trustee's individual liability in any manner inconsistent with the federal securities laws.

PORTFOLIO TRANSACTIONS AND BROKERAGE

The policy of the Trust regarding purchases and sales of securities for each Fund is that primary consideration will be given to obtaining the most favorable prices and efficient executions of transactions. Consistent with this policy, when securities transactions are effected on a stock exchange, the Trust's policy is to pay commissions which are considered fair and reasonable without necessarily determining that the lowest possible commissions are paid in all circumstances. The Trust believes that a requirement always to seek the lowest possible commission cost could impede effective portfolio management and preclude the Funds and the Sub-Adviser from obtaining a high quality of brokerage and research services. In seeking to determine the reasonableness of brokerage commissions paid in any transaction, the Sub-Adviser will rely upon its experience and knowledge regarding commissions generally charged by various brokers and on its judgment in evaluating the brokerage services received from the broker effecting the transaction. Such determinations are necessarily subjective and imprecise, and in most cases, exact dollar values for those services are not ascertainable. The Trust has adopted policies and procedures that prohibit the consideration of sales of a Fund's shares as a factor in the selection of a broker or dealer to execute its portfolio transactions.

The Sub-Adviser owes a fiduciary duty to its clients to seek to provide best execution on trades effected. In selecting a broker/dealer for each specific transaction, the Sub-Adviser chooses the broker/dealer deemed most capable of providing the services necessary to obtain the most favorable execution. The Sub-Adviser uses several brokerage firms for execution services who specialize in index management as well as agency and principal trading. To the extent that the Sub-Adviser engages in brokerage transactions with a broker-dealer that is an affiliated person, it will do so in accordance with applicable law. The Trading Sub-Adviser's use of an affiliated broker-dealer creates a potential conflict of interest to favor an affiliate. The Trading Sub-Adviser's brokerage allocation process and best execution reviews seek to identify and address potential conflicts of interest.

Best execution is generally understood to mean the most favorable cost or net proceeds reasonably obtainable under the circumstances. The full range of brokerage services applicable to a particular transaction may be considered when making this judgment, which may include, but is not limited to: liquidity, price, commission, timing, aggregated trades, capable floor brokers or traders, competent block trading coverage, ability to position, capital strength and stability, reliable and accurate communications and settlement processing, use of automation, knowledge of other buyers or sellers, arbitrage skills, administrative ability,

underwriting and provision of information on a particular security or market in which the transaction is to occur. The specific criteria will vary depending upon the nature of the transaction, the market in which it is executed, and the extent to which it is possible to select from among multiple broker/dealers. The Sub-Adviser will also use electronic crossing networks (“ECNs”) when appropriate.

Section 28(e) of the 1934 Act permits the Sub-Adviser, under certain circumstances, to cause a Fund to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction in recognition of the value of brokerage and research services provided by the broker or dealer. The Sub-Adviser may receive a variety of research services and information on many topics, which it can use in connection with its management responsibilities with respect to the various accounts over which it exercises investment discretion or otherwise provides investment advice. The research services may include qualifying order management systems, portfolio attribution and monitoring services and computer software and access charges which are directly related to investment research. Accordingly, a Fund may pay a broker commission higher than the lowest available in recognition of the broker’s provision of such services to the Sub-Adviser, but only if the Sub-Adviser determines the total commission (including the soft dollar benefit) is comparable to the best commission rate that could be expected to be received from other brokers. The amount of soft dollar benefits received depends on the amount of brokerage transactions effected with the brokers. A conflict of interest exists because there is an incentive to: 1) cause clients to pay a higher commission than the firm might otherwise be able to negotiate; 2) cause clients to engage in more securities transactions than would otherwise be optimal; and 3) only recommend brokers that provide soft dollar benefits.

The Sub-Adviser faces a potential conflict of interest when it uses client trades to obtain brokerage or research services. This conflict exists because the Sub-Adviser is able to use the brokerage or research services to manage client accounts without paying cash for such services, which reduces the Sub-Adviser’s expenses to the extent that the Sub-Adviser would have purchased such products had they not been provided by brokers. Section 28(e) permits the Sub-Adviser to use brokerage or research services for the benefit of any account it manages. Certain accounts managed by the Sub-Adviser may generate soft dollars used to purchase brokerage or research services that ultimately benefit other accounts managed by the Sub-Adviser, effectively cross subsidizing the other accounts managed by the Sub-Adviser that benefit directly from the product. The Sub-Adviser may not necessarily use all of the brokerage or research services in connection with managing a Fund whose trades generated the soft dollars used to purchase such products.

Neither the Adviser nor the Sub-Adviser currently uses Fund assets for, or participates in, any third party soft dollar arrangements, although they may do so in the future. However, they may receive proprietary research from various full service brokers, the cost of which is bundled with the cost of the broker’s execution services. The Adviser and the Sub-Adviser do not “pay up” for the value of any such proprietary research.

The Sub-Adviser is responsible, subject to oversight by the Adviser and the Board, for placing orders on behalf of the Funds for the purchase or sale of portfolio securities. If purchases or sales of portfolio securities of a Fund and one or more other investment companies or clients supervised by the Sub-Adviser are considered at or about the same time, transactions in such securities are allocated among the several investment companies and clients in a manner deemed equitable and consistent with its fiduciary obligations to all by the Sub-Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security so far as a Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower brokerage commissions will be beneficial to a Fund. The primary consideration is prompt execution of orders at the most favorable net price.

A Fund may deal with affiliates in principal transactions to the extent permitted by exemptive order or applicable rule or regulation.

The table below shows the aggregate brokerage commissions on portfolio transactions paid by each Fund for the period indicated.

	Fiscal Period May 3, 2016 ¹ through March 31, 2017	Fiscal Period April 1, 2017 through November 30, 2017
REX VolMAXX™ Long VIX Futures Strategy ETF	\$4,703	\$976
REX VolMAXX™ Short VIX Futures Strategy ETF	\$15,567	\$51,149

¹ Commencement of operations.

Directed Brokerage. For the fiscal period April 1, 2017 through November 30, 2017, the Funds did not pay commissions on brokerage transactions directed to brokers pursuant to an agreement or understanding whereby the broker provides research or other brokerage services to the Adviser or Sub-Adviser.

Brokerage with Fund Affiliates. The Funds may execute brokerage or other agency transactions through registered broker-dealer affiliates of the Funds, the Adviser, the Sub-Adviser, or the Distributor for a commission in conformity with the 1940 Act, the Exchange Act and rules promulgated by the SEC. These rules further require that commissions paid to the affiliate by the Funds for exchange transactions not exceed “usual and customary” brokerage commissions. The rules define “usual and customary” commissions to include amounts which are “reasonable and fair compared to the commission, fee or other remuneration received or to be received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time.” The Board, including those members who are not “interested persons” of the Funds, has adopted procedures for evaluating the reasonableness of commissions paid to affiliates and reviews these procedures periodically. For the fiscal periods May 3, 2016 (commencement of operations) through March 30, 2017, and April 1, 2017 through November 30, 2017, the Funds did not pay brokerage commissions to affiliated brokers.

Securities of “Regular Broker-Dealers.” Each Fund is required to identify any securities of its “regular brokers and dealers” (as such term is defined in the 1940 Act) which the Fund may hold at the close of its most recent fiscal year. “Regular brokers or dealers” of a Fund are the ten brokers or dealers that, during the most recent fiscal year: (i) received the greatest dollar amounts of brokerage commissions from the Fund’s portfolio transactions; (ii) engaged as principal in the largest dollar amounts of portfolio transactions of the Fund; or (iii) sold the largest dollar amounts of the Fund’s shares. As of November 30, 2017, the Funds did not hold any securities of their “regular brokers and dealers.”

PORTFOLIO TURNOVER RATE

Portfolio turnover may vary from year to year, as well as within a year. Generally, the higher a Fund’s rate of portfolio turnover, the higher the transaction costs borne by the Fund and its long-term shareholders. In addition, a Fund’s portfolio turnover level may adversely affect the ability of the Fund to achieve its investment objective. Because a Fund’s portfolio turnover rate, to a great extent, will depend on the creation and redemption activity of investors, it is difficult to estimate what a Fund’s actual portfolio turnover rate will be in the future.

“Portfolio Turnover Rate” is defined under the rules of the SEC as the lesser of the value of the securities purchased or of the securities sold, excluding all securities whose maturities at the time of acquisition were one-year or less, divided by the average monthly value of such securities owned during the year. Based on

this definition, instruments with a remaining maturity of less than one-year are excluded from the calculation of the portfolio turnover rate. Instruments excluded from the calculation of portfolio turnover generally would include the futures contracts and options contracts in which a Fund invests since such contracts generally have a remaining maturity of less than one year.

BOOK ENTRY ONLY SYSTEM

The following information supplements and should be read in conjunction with the section in the Fund's Prospectus entitled "Shareholder Information."

Depository Trust Company ("DTC") acts as securities depository for the Funds' shares. Shares of the Fund are represented by securities registered in the name of DTC or its nominee, Cede & Co., and deposited with, or on behalf of, DTC.

DTC is a limited-purpose trust company that was created to hold securities of its participants (the "DTC Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities' certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "Indirect Participants").

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depository Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the shares of a Fund held by each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participants a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of a Fund as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants. DTC may decide to discontinue providing its service with respect to shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action to find a replacement for DTC to perform its functions at a comparable cost. The DTC Participants' rules and policies are made publicly available through its website at www.dtcc.com.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

Although the Trust does not have information concerning the beneficial ownership of shares held in the names of DTC Participants, as of March 1, 2018, the name, address and percentage ownership of each DTC Participant that owned of record 5% or more of the outstanding Shares of the Funds are set forth in the table below.

CREATION AND REDEMPTION OF CREATION UNITS

Each Fund offers and issues shares at NAV in Creation Unit Aggregations, generally in exchange for the Deposit Securities and Cash Component. Shares are redeemable only in Creation Unit Aggregations and, generally, in exchange for the Deposit Securities and Cash Component.

As is further discussed below, the Trust reserves the right to offer an “all cash” option for creations and redemptions of Creation Units for a Fund. In addition, Creation Units may be issued in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain a cash deposit with the Trust at least equal to 115% of the market value of the missing Deposit Securities. In each instance, transaction fees may be imposed that will be higher than the transaction fees associated with traditional in-kind creations or redemptions. In all cases, such fees will be limited in accordance with SEC requirements applicable to management investment companies offering redeemable securities.

Creation

The Trust issues and sells shares of each Fund only in Creation Units on a continuous basis through the Distributor, at their NAV next determined after receipt, on any Business Day (as defined below), of an order received in proper form.

A “Business Day” with respect to a Fund is any day on which the Exchange is open for business. As of the date of the Prospectus, the Exchange observes the following holidays: New Year’s Day, Martin Luther King, Jr. Day, President’s Day (Washington’s Birthday), Good Friday, Memorial Day (observed), Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Fund Deposit. The consideration for purchase of a Creation Unit of a Fund generally consists of an in-kind deposit of a designated portfolio of securities – the “Deposit Securities” – per each Creation Unit constituting a substantial replication, or a representation, of the securities included in the Fund’s portfolio and an amount of cash – the Cash Component – computed as described below. Together, the Deposit Securities and the Cash Component constitute the “Fund Deposit,” which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The Cash Component is an amount equal to the difference between the NAV of the shares (per Creation Unit) and the market value of the Deposit Securities. If the Cash Component is a positive number (*i.e.*, the NAV per Creation Unit exceeds the market value of the Deposit Securities), the Cash Component shall be such positive amount. If the Cash Component is a negative number (*i.e.*, the NAV per Creation Unit is less than the market value of the Deposit Securities), the Cash Component shall be such negative amount and the creator will be entitled to receive cash from the Fund in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the market value of the Deposit Securities.

The Administrator, through the National Securities Clearing Corporation (“NSCC”) (discussed below), makes available on each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the list of the names and the required number of shares of each Deposit Security to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for each Fund. Such Fund Deposit is applicable, subject to any adjustments as described below, in order to effect creations of Creation Units of a Fund until such time as the next-announced composition of the Deposit Securities is made available.

The identity and number of shares of the Deposit Securities required for a Fund Deposit for each Fund changes as rebalancing adjustments and corporate action events are reflected from time to time by the Sub-Adviser to the Fund with a view to the investment objectives of the Fund. In addition, the Trust reserves the right to permit or require the substitution of an amount of cash – *i.e.*, a “cash in lieu” amount – to be added to the Cash Component to replace any Deposit Security which may not be available in sufficient quantity for delivery or which may not be eligible for transfer through the Clearing Process (discussed below), or which may not be eligible for trading by an Authorized Participant (as defined below) or the investor for which it is acting. The Trust also reserves the right to offer an “all cash” option for creations of Creation Units for each Fund.

In addition to the list of names and numbers of securities constituting the current Deposit Securities of a Fund Deposit, the Administrator, through the NSCC, also makes available on each Business Day, the estimated Cash Component, effective through and including the previous Business Day, per outstanding Creation Unit of each Fund.

Procedures for Creation of Creation Units. To be eligible to place orders with the Distributor to create a Creation Unit of a Fund, an entity must be (i) a “Participating Party,” *i.e.*, a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”), a clearing agency that is registered with the SEC; or (ii) a DTC Participant (see “Book Entry Only System”), and, in each case, must have executed an agreement with the Trust, the Distributor and the Administrator with respect to creations and redemptions of Creation Units (“Participant Agreement”) (discussed below). A Participating Party and DTC Participant are collectively referred to as an “Authorized Participant.” Investors should contact the Distributor for the names of Authorized Participants that have signed a Participant Agreement with the Funds. All shares of each Fund, however created, will be entered on the records of DTC in the name of Cede & Co. for the account of a DTC Participant.

All orders to create Creation Units must be placed for one or more Creation Unit size aggregations of at least 50,000 shares. All orders to create Creation Units, whether through the Clearing Process (through a Participating Party) or outside the Clearing Process (through a DTC Participant), must be received by the

Distributor no later than 3:00 p.m., Eastern Time, an hour earlier than the close of the regular trading session on the Exchange (ordinarily 4:00 p.m., Eastern Time) (“Closing Time”), in each case on the date such order is placed in order for the creation of Creation Units to be effected based on the NAV of shares of each Fund as next determined on such date after receipt of the order in proper form. The date on which an order to create Creation Units (or an order to redeem Creation Units as discussed below) is placed is referred to as the “Transmittal Date.” Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement, as described below (see “Placement of Creation Orders Using Clearing Process” and “Placement of Creation Orders Outside Clearing Process”). Severe economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach the Distributor or an Authorized Participant.

If permitted by the Sub-Adviser in its sole discretion with respect to a Fund, an Authorized Participant may also agree to enter into or arrange for an exchange of a futures contract for related position (“EFCRP”) or block trade with the relevant Fund or its Subsidiary whereby the Authorized Participant would also transfer to such Fund a number and type of exchange-traded futures contracts at or near the closing settlement price for such contracts on the purchase order date. Similarly, the Sub-Adviser in its sole discretion may agree with an Authorized Participant to use an EFCRP or block trade to effect an order to redeem Creation Units.

An EFCRP is a technique permitted by the rules of certain futures exchanges that, as utilized by a Fund in the Sub-Adviser’s discretion, would allow such Fund or its Subsidiary to take a position in a futures contract from an Authorized Participant, or give futures contracts to an Authorized Participant, in the case of a redemption, rather than to enter the futures exchange markets to obtain such a position. An EFCRP by itself will not change either party’s net risk position materially. Because the futures position that a Fund would otherwise need to take in order to meet its investment objective can be obtained without unnecessarily impacting the financial or futures markets or their pricing, EFCRPs can generally be viewed as transactions beneficial to a Fund. A block trade is a technique that permits certain Funds to obtain a futures position without going through the market auction system and can generally be viewed as a transaction beneficial to the Fund.

Orders to create Creation Units of a Fund shall be placed with an Authorized Participant, as applicable, in the form required by such Authorized Participant. In addition, the Authorized Participant may request the investor to make certain representations or enter into agreements with respect to the order, *i.e.*, to provide for payments of cash, when required. Investors should be aware that their particular broker may not have executed a Participant Agreement and, therefore, orders to create Creation Units of a Fund have to be placed by the investor’s broker through an Authorized Participant that has executed a Participant Agreement. At any given time there may be only a limited number of broker-dealers that have executed a Participant Agreement. Those placing orders for Creation Units through the Clearing Process should afford sufficient time to permit proper submission of the order to the Distributor prior to 3:00 p.m., Eastern Time, on the Transmittal Date.

Orders for creation that are effected outside the Clearing Process are likely to require transmittal by the DTC Participant earlier on the Transmittal Date than orders effected using the Clearing Process. Those persons placing orders outside the Clearing Process, should ascertain the deadlines applicable to DTC and the Federal Reserve Bank wire system by contacting the operations department of the broker or depository institution effecting such transfer of Deposit Securities and Cash Component.

Placement of Creation Orders Using the Clearing Process. The Clearing Process is the process of creating or redeeming Creation Units through the Continuous Net Settlement System of the NSCC. Fund Deposits made through the Clearing Process must be delivered through a Participating Party that has executed a Participant Agreement. The Participant Agreement authorizes the Distributor to transmit through

the Funds' transfer agent to NSCC, on behalf of the Participating Party, such trade instructions as are necessary to effect the Participating Party's creation order. Pursuant to such trade instructions to NSCC, the Participating Party agrees to deliver the requisite Deposit Securities and the Cash Component to the Trust, together with such additional information as may be required by the Distributor. An order to create Creation Units through the Clearing Process is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than 3:00 p.m., Eastern Time on such Transmittal Date and (ii) all other procedures set forth in the Participant Agreement are properly followed.

Placement of Creation Orders Outside the Clearing Process. Fund Deposits made outside the Clearing Process must be delivered through a DTC Participant that has executed a Participant Agreement with the Trust, the Distributor and the Administrator. A DTC Participant who wishes to place an order creating Creation Units to be effected outside the Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Units will instead be effected through a transfer of securities and cash directly through DTC. A Fund Deposit transfer must be ordered by the DTC Participant on the Transmittal Date in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities through DTC to the account of the Trust by no later than 11:00 a.m., Eastern Time, of the next Business Day immediately following the Transmittal Date. All questions as to the number of Deposit Securities to be delivered, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities, will be determined by the Trust, whose determination shall be final and binding. The cash equal to the Cash Component must be transferred directly to the Administrator through the Federal Reserve wire system in a timely manner so as to be received by the Administrator no later than 2:00 p.m., Eastern Time, on the next Business Day immediately following such Transmittal Date. An order to create Creation Units outside the Clearing Process is deemed received by the Distributor on the Transmittal Date if (i) such order is received by the Distributor not later than 3:00 p.m., Eastern Time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed. However, if the Administrator does not receive both the requisite Deposit Securities and the Cash Component by 11:00 a.m. and 2:00 p.m., respectively, on the next Business Day immediately following the Transmittal Date, such order will be cancelled. Upon written notice to the Distributor, such cancelled order may be resubmitted the following Business Day using a Fund Deposit as newly constituted to reflect the then current NAV of the Funds. The delivery of Creation Units of a Fund so created will occur no later than the third (3rd) Business Day following the day on which the purchase order is deemed received by the Distributor.

Creation Units may be created in advance of receipt by the Trust of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the shares on the date the order is placed in proper form since in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) 115% of the market value of the undelivered Deposit Securities (the "Additional Cash Deposit"). The order shall be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to 3:00 p.m., Eastern Time on such date and federal funds in the appropriate amount are deposited with the Administrator by 11:00 a.m., Eastern Time, the following Business Day. If the order is not placed in proper form by 3:00 p.m., Eastern Time or federal funds in the appropriate amount are not received by 11:00 a.m. the next Business Day, then the order may be deemed to be rejected and the investor shall be liable to the Trust for losses, if any, resulting therefrom. An additional amount of cash shall be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to 115% of the daily marked to market value of the missing Deposit Securities. To the extent that missing Deposit Securities are not received by 1:00 p.m., Eastern Time, on the third Business Day following the day on which the purchase order is deemed received by the Distributor or in the event a mark to market payment is not made within one Business Day following notification by the Distributor that such a payment is required, the Trust may use the cash on deposit to purchase the missing Deposit Securities. Authorized Participants will be

liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the day the purchase order was deemed received by the Distributor plus the brokerage and related transaction costs associated with such purchases. The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Administrator or purchased by the Trust and deposited into the Trust. In addition, a transaction fee will be charged in all cases. The delivery of Creation Units of a Fund so created will occur no later than the third Business Day following the day on which the purchase order is deemed received by the Distributor.

Acceptance of Orders for Creation Units. The Trust reserves the absolute right to reject a creation order transmitted to it by the Distributor in respect of a Fund if (a) the order is not in proper form; (b) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (c) the Deposit Securities delivered are not as disseminated through the facilities of the Exchange for that date by the Administrator, as described above; (d) acceptance of the Deposit Securities or Cash Purchase Amount would have certain adverse tax consequences to the Fund; (e) the acceptance of the Fund Deposit or Cash Purchase Amount would, in the opinion of counsel, be unlawful; (f) the acceptance of the Fund Deposit or Cash Purchase Amount would otherwise, in the discretion of the Trust or the Adviser, have an adverse effect on the Trust or the rights of beneficial owners; or (g) in the event that circumstances outside the control of the Trust, the Distributor and the Adviser make it for all practical purposes impossible to process creation orders. Examples of such circumstances include acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Adviser, the Distributor, DTC, NSCC or any other participant in the creation process, and similar extraordinary events. The Distributor shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit of its rejection of the order of such person. The Trust, the Administrator and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits or Cash Purchase Amounts nor shall either of them incur any liability for the failure to give any such notification.

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

Creation Transaction Fee. To compensate the Trust for transfer and other transaction costs involved in creation transactions through the Clearing Process, investors will be required to pay a minimum creation transaction fee, assessed per transaction, as follows:

Fund	Creation Transaction Fee*
REX VolMAXX™ Long VIX Futures Strategy ETF	\$500 + 0.02% of the Creation Unit's NAV
REX VolMAXX™ Short VIX Futures Strategy ETF	\$500 + 0.02% of the Creation Unit's NAV

* To the extent a Creation Unit consists of more than 100 securities, an additional Creation Transaction Fee may be charged to Authorized Participants to the next highest \$500 increment at the following rates: (i) \$5 per book-entry security settled via the NSCC's CNS; and (ii) \$15 per security for "in-kind" settlements settled outside the NSCC, and all physical settlements, including options, futures and other derivatives.

A Fund may adjust the Creation Transaction Fee from time to time based upon actual experience. Investors who use the services of a broker or other such intermediary in addition to an Authorized Participant to effect a creation of a Creation Unit may be charged a fee for such services.

Redemption

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by a Fund through the Administrator and only on a Business Day. The Trust will not redeem shares in amounts less than Creation Units. Beneficial Owners must accumulate enough shares in the secondary market to constitute a Creation Unit in order to have such shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of shares to constitute a redeemable Creation Unit.

With respect to the Funds, the Administrator, through the NSCC, makes available prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time) on each Business Day, the “Fund Securities” that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day. Fund Securities received on redemption may not be identical to Deposit Securities which are applicable to creations of Creation Units.

Cash Redemption Amount. Unless cash redemptions are available or specified for a Fund, the redemption proceeds for a Creation Unit generally consist of Fund Securities – as announced by the Administrator on the Business Day of the request for redemption received in proper form – plus cash in an amount equal to the difference between the NAV of the shares being redeemed, as next determined after receipt of a request in proper form, and the value of the Fund Securities (the “Cash Redemption Amount”), less a redemption transaction fee described below in the section entitled “Redemption Transaction Fee”. In the event that the Fund Securities have a value greater than the NAV of the shares, a compensating cash payment equal to the differential is required to be made by or through an Authorized Participant by the redeeming shareholder.

Placement of Redemption Orders Using Clearing Process. Orders to redeem Creation Units through the Clearing Process must be delivered through a Participating Party that has executed the Participant Agreement. An order to redeem Creation Units using the Clearing Process is deemed received on the Transmittal Date if (i) such order is received by the Administrator not later than 3:00 p.m., Eastern Time on such Transmittal Date; and (ii) all other procedures set forth in the Participant Agreement are properly followed; such order will be effected based on the NAV of a Fund as next determined. An order to redeem Creation Units using the Clearing Process made in proper form but received by a Fund after 3:00 p.m., Eastern Time will be deemed received on the next Business Day immediately following the Transmittal Date and will be effected at the NAV next determined on such Business Day. The requisite Fund Securities and the Cash Redemption Amount will be transferred by the third (3rd) NSCC Business Day following the date on which such request for redemption is deemed received.

Placement of Redemption Orders Outside Clearing Process. Orders to redeem Creation Units outside the Clearing Process must be delivered through a DTC Participant that has executed the Participant Agreement. A DTC Participant who wishes to place an order for redemption of Creation Units to be effected outside the Clearing Process need not be a Participating Party, but such orders must state that the DTC Participant is not using the Clearing Process and that redemption of Creation Units will instead be effected through transfer of shares directly through DTC. An order to redeem Creation Units outside the Clearing Process is deemed received by the Administrator on the Transmittal Date if (i) such order is received by the Administrator not later than 3:00 p.m., Eastern Time on such Transmittal Date; (ii) such order is accompanied or preceded by the requisite number of shares of a Fund and/or the Cash Redemption Amount specified in such order, which delivery must be made through DTC to the Administrator no later than 11:00

a.m. and 2:00 p.m., respectively, Eastern Time, on the next Business Day following such Transmittal Date (the “DTC Cut-Off-Time”); and (iii) all other procedures set forth in the Participant Agreement are properly followed.

After the Administrator has deemed an order for redemption outside the Clearing Process received, the Administrator will initiate procedures to transfer the requisite Fund Securities, which are expected to be delivered within three Business Days, and/or the Cash Redemption Amount to the Authorized Participant, on behalf of the redeeming Beneficial Owner, by the third Business Day following the Transmittal Date on which such redemption order is deemed received by the Administrator.

The calculation of the value of the Fund Securities and the Cash Redemption Amount to be delivered upon redemption will be made by the Administrator according to the procedures set forth under “Determination of Net Asset Value” computed on the Business Day on which a redemption order is deemed received by the Administrator. Therefore, if a redemption order in proper form is submitted to the Administrator by a DTC Participant not later than 3:00 p.m., Eastern Time on the Transmittal Date, and the requisite number of shares of a Fund are delivered to the custodian prior to the DTC Cut-Off-Time, then the value of the Fund Securities and/or the Cash Redemption Amount to be delivered will be determined by the Administrator on such Transmittal Date. If, however, a redemption order is submitted to the Administrator by a DTC Participant not later than 3:00 p.m., Eastern Time on the Transmittal Date, but either (1) the requisite number of shares of a Fund are not delivered by the DTC Cut-Off-Time as described above on the next Business Day following the Transmittal Date or (2) the redemption order is not submitted in proper form, then the redemption order will not be deemed received as of the Transmittal Date. In such case, the value of the Fund Securities and the Cash Redemption Amount to be delivered will be computed on the Business Day that such order is deemed received by the Administrator, *i.e.*, the Business Day on which the shares of a Fund are delivered through DTC to the Administrator by the DTC Cut-Off-Time on such Business Day pursuant to a properly submitted redemption order.

If it is not possible to effect deliveries of the Fund Securities, the Trust may in its discretion exercise its option to redeem such shares in cash, and the redeeming Beneficial Owner will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash which a Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its shares based on the NAV of shares of a Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions specified above, to offset the Trust’s brokerage and other transaction costs associated with the disposition of Fund Securities). Each Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities which differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and each Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Fund could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An Authorized Participant or an investor for which it is acting subject to a legal restriction with respect to a particular stock included in the Fund Securities applicable to the redemption of a Creation Unit may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming Beneficial Owner of the shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment, beneficial ownership of shares or delivery instructions. The Trust also reserves the right to offer an “all cash” option for redemptions of Creation Units for a Fund.

The right of redemption may be suspended or the date of payment postponed with respect to a Fund (1) for any period during which the New York Stock Exchange is closed (other than customary weekend and holiday

closings); (2) for any period during which trading on the New York Stock Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of securities owned by the Fund or determination of the shares' NAV is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

Redemption Transaction Fee. To compensate the Trust for transfer and other transaction costs involved in redemption transactions through the Clearing Process, investors will be required to pay a minimum redemption transaction fee, assessed per transaction as follows:

Fund	Redemption Transaction Fee*
REX VolMAXX™ Long VIX Futures Strategy ETF	\$500 + 0.02% of the Creation Unit's NAV
REX VolMAXX™ Short VIX Futures Strategy ETF	\$500 + 0.02% of the Creation Unit's NAV

* To the extent a Creation Unit consists of more than 100 securities, an additional Redemption Transaction Fee may be charged to Authorized Participants to the next highest \$500 increment at the following rates: (i) \$5 per book-entry security settled via the NSCC's CNS; and (ii) \$15 per security for "in-kind" settlements settled outside the NSCC, and all physical settlements, including options, futures and other derivatives.

A Fund may adjust the Redemption Transaction Fee from time to time based upon actual experience. Investors who use the services of a broker or other such intermediary in addition to an Authorized Participant to effect a redemption of a Creation Unit may be charged a fee for such services.

DETERMINATION OF NET ASSET VALUE

The following information supplements and should be read in conjunction with the section in the Funds' Prospectus entitled "Calculating NAV."

The NAV per share of each Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of shares of the Fund outstanding, rounded to the nearest cent. Expenses and fees, including without limitation, the management, administration and distribution fees, are accrued daily and taken into account for purposes of determining NAV per share. The NAV per share for each Fund is calculated by the Administrator and determined as of 4:15 p.m. Eastern Time on each day that such exchange is open.

In computing a Fund's NAV, the Fund's securities holdings are valued based on their last readily available market price. Price information on listed securities is taken from the exchange where the security is primarily traded. Other portfolio securities and assets for which market quotations are not readily available or determined to not represent the current fair value are valued based on fair value as determined in good faith by the Sub-Adviser in accordance with procedures adopted by the Board.

Futures contracts will be valued at the settlement or closing price determined by the applicable exchange. Cash Instruments may be valued at market values, as furnished by recognized dealers in such securities or assets. Cash Instruments also may be valued on the basis of information furnished by an independent pricing service that uses a valuation matrix which incorporates both dealer-supplied valuations and electronic data processing techniques.

Short-term debt securities with remaining maturities of sixty days or less for which market quotations and information furnished by an independent pricing service are not readily available will be valued at amortized cost, which approximates current value. Shares of money market mutual funds held by each Fund will be valued at their respective NAVs.

DIVIDENDS AND DISTRIBUTIONS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled “Dividends, Distributions and Taxes.”

General Policies. Dividends from net investment income, if any, are declared and paid at least annually by the Funds. Distributions of net realized securities gains, if any, generally are declared and paid once a year, but the Fund may make distributions on a more frequent basis for the Fund to comply with the distribution requirements of the Internal Revenue Code, in all events in a manner consistent with the provisions of the 1940 Act.

Dividends and other distributions on shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Fund.

Each Fund may make additional distributions to the extent necessary (i) to distribute the entire annual taxable income of the Fund, plus any net capital gains and (ii) to avoid imposition of the excise tax imposed by Section 4982 of the Internal Revenue Code. Management of the Trust reserves the right to declare special dividends for the Fund if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income.

Dividend Reinvestment Service. No reinvestment service is provided by the Trust. Broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund for reinvestment of their dividend distributions. Beneficial Owners should contact their broker to determine the availability and costs of the service and the details of participation therein. Brokers may require Beneficial Owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund.

FEDERAL INCOME TAXES

The following is a summary of certain additional U.S. federal income tax considerations generally affecting the Funds and their shareholders that supplements the discussion in the Prospectus. No attempt is made to present a comprehensive explanation of the federal, state, local or foreign tax treatment of the Funds or their shareholders, and the discussion here and in the Prospectus is not intended to be a substitute for careful tax planning. The summary is very general, and does not address investors subject to special rules, such as investors who hold shares through an IRA, 401(k) or other tax-advantaged account.

The following general discussion of certain U.S. federal income tax consequences is based on provisions of the Internal Revenue Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Recently enacted tax legislation commonly referred to as the Tax Cuts and Jobs Act (the “Tax Act”) makes significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable

to individuals are temporary and would apply only to taxable years beginning after December 31, 2017 and before January 1, 2026. There are only minor changes with respect to the specific rules only applicable to a RIC, such as a Fund. The Tax Act, however, makes numerous other changes to the tax rules that may affect shareholders and the Funds. You are urged to consult with your own tax advisor regarding how the Tax Act affects your investment in the Funds.

Shareholders are urged to consult their own tax advisers regarding the application of the provisions of tax law described in this SAI in light of the particular tax situations of the shareholders and regarding specific questions as to federal, state, or local taxes.

Regulated Investment Company Status. Each Fund will seek to qualify for treatment as a RIC under the Internal Revenue Code. By following such a policy, the Funds expect to eliminate or reduce to a nominal amount the federal taxes to which they may be subject. If a Fund qualifies as a RIC, it will generally not be subject to federal income taxes on the net investment income and net realized capital gains that it timely distributes to its shareholders. The Board reserves the right not to maintain the qualification of a Fund as a RIC if it determines such course of action to be beneficial to shareholders.

In order to qualify as a RIC under the Internal Revenue Code, each Fund must distribute annually to its shareholders at least an amount equal to the sum of 90% of the Fund's investment company taxable income for such year (including, for this purpose, the excess of net short-term capital gains over net long-term capital losses), computed without regard to the dividends-paid deduction, and 90% of its net tax-exempt interest income for such year and also must meet certain additional requirements. One of these additional requirements for RIC qualification is that a Fund must receive at least 90% of the Fund's gross income each year from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to the Fund's business of investing in stock, securities, foreign currencies and net income from interests in qualified publicly traded partnerships (the "90% Test"). A second requirement for qualification as a RIC is that a Fund must diversify its holdings so that, at the end of each quarter of the Fund's taxable year: (a) at least 50% of the market value of the Fund's total assets is represented by cash and cash items, U.S. government securities, securities of other RICs, and other securities, with these other securities limited, in respect to any one issuer, to an amount not greater than 5% of the value of the Fund's total assets or 10% of the outstanding voting securities of such issuer; and (b) not more than 25% of the value of its total assets is invested, including through corporations in which the Fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or securities of other RICs) of any one issuer, the securities (other than securities of other RICs) of two or more issuers which the Fund controls and which are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the "Asset Test").

The Funds may invest directly in certain instruments, which may not generate qualifying income for purposes of the 90% Test. To the extent a Fund invests in such instruments directly, the Fund will seek to restrict its income from investments that do not generate qualifying income to a maximum of 10% of its gross income (when combined with its other investments that produce non-qualifying income). The Funds, however, intend to principally gain exposure to certain non-qualifying investments through their investment in their respective Subsidiary. The Funds believe that income from their respective Subsidiary will be qualifying income because they expect that the Subsidiaries will make annual distributions of its earnings and profits. The Funds have secured an opinion of counsel based on customary representations that actual distributions of all earnings and profits of their respective Subsidiary each taxable year made to the Funds should be treated as "qualifying income." In addition, for purposes of satisfying the Asset Test it may be difficult for a Fund to identify the "issuer" of certain Fund investments including derivative investments. The IRS could make an adverse determination with respect to identifying the issuer of Fund investments and could disagree with a Fund's valuation of the underlying issuers to a particular derivative. Such an adverse

determination could adversely affect a Fund's ability to meet the Asset Test described above and could therefore jeopardize such Fund's status as a RIC.

If a Fund fails to satisfy the 90% Test or the Asset Test, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain *de minimis* failures of the Asset Test where a Fund corrects the failure within a specified period of time. In order to be eligible for the relief provisions with respect to a failure to meet the Asset Test, a Fund may be required to dispose of certain assets. If these relief provisions are not available to a Fund and it fails to qualify for treatment as a RIC for a taxable year, all of its taxable income would be subject to tax at regular corporate income tax rates (which the Tax Act has reduced to 21%) without any deduction for distributions to shareholders, and its distributions (including capital gains distributions) generally would be taxable as ordinary income dividends to its shareholders, subject to the dividends-received deduction for corporate shareholders and the lower tax rates on qualified dividend income received by non-corporate shareholders. To requalify for treatment as a RIC in a subsequent taxable year, a Fund would be required to satisfy the RIC qualification requirements for that year and to distribute any earnings and profits from any year in which the Fund failed to qualify for tax treatment as a RIC. If a Fund fails to qualify as a RIC for a period longer than two taxable years, it would generally be required to pay a Fund-level tax on certain net built-in gains recognized with respect to certain of its assets upon a disposition of such assets within five years of qualifying as a RIC in a subsequent year. The Board reserves the right not to maintain the qualification of a Fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders. If a Fund determines that it will not qualify for treatment as a RIC, the Fund will establish procedures to reflect the anticipated tax liability in the Fund's NAV.

Each Fund intends to distribute annually to its shareholders substantially all of its investment company taxable income (computed without regard to the dividends-paid deduction) and any realized net capital gain (after taking into account any capital loss carryovers). If a Fund failed to satisfy the distribution requirement for any taxable year, the Fund would be taxed as a regular corporation, with consequences generally similar to those described above. If a Fund meets the Distribution Requirement but retains some or all of its income or gains, it will be subject to federal income tax to the extent any such income or gains are not distributed. A Fund may designate certain amounts retained as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amount so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the Fund on that undistributed amount against their federal income tax liabilities and to claim refunds to the extent such credits exceed their liabilities and (iii) will be entitled to increase their tax basis, for federal income tax purposes, in their Shares in that Fund by an amount equal to the excess of the amount of undistributed net capital gain included in their respective income over their respective income tax credits.

Notwithstanding the Distribution Requirement described above, each Fund will be subject to a nondeductible 4% federal excise tax on certain undistributed income if it does not distribute (and is not deemed to distribute) to its shareholders in each calendar year an amount at least equal to 98% of its ordinary income for the calendar year plus 98.2% of its capital gain net income for the twelve months ended October 31 of that year, subject to an increase for any shortfall in the prior year's distribution. For this purpose, any ordinary income or capital gain net income retained by a Fund and subject to corporate income tax will be considered to have been distributed. The Funds intend to declare and distribute dividends and distributions in amounts and at times necessary to avoid the application of this 4% excise tax, but can make no assurances that all such tax liability will be eliminated. A Fund may in certain circumstances be required to liquidate Fund investments in order to make sufficient distributions to avoid federal excise tax liability at a time when the investment adviser might not otherwise have chosen to do so, and liquidation of investments in such circumstances may affect the ability of the Fund to satisfy the requirement for qualification as a RIC.

A Fund may elect to treat part or all of any “qualified late year loss” as if it had been incurred in the succeeding taxable year in determining the Fund’s taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such “qualified late year loss” as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A “qualified late year loss” generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as “post-October losses”) and certain other late-year losses.

Capital losses in excess of capital gains (“net capital losses”) are not permitted to be deducted against a RIC’s net investment income. Instead, for U.S. federal income tax purposes, potentially subject to certain limitations, a RIC may carry net capital losses from any taxable year forward to offset capital gains in future years. Each Fund is permitted to carry net capital losses forward indefinitely. To the extent subsequent capital gains are offset by such losses, they will not result in U.S. federal income tax liability to the applicable Fund and may not be distributed as capital gains to shareholders. Generally, a Fund may not carry forward any losses other than net capital losses. The carryover of capital losses may be limited under the general loss limitation rules if a Fund experiences an ownership change as defined in the Internal Revenue Code.

Taxation of Shareholders. The Funds receive income generally in the form of dividends and interest on investments. This income, plus net short-term capital gains, if any, less expenses incurred in the operation of a Fund, constitutes the Fund’s net investment income from which dividends may be paid to you. Any distributions by a Fund from such income will be taxable to you as ordinary income or at the lower capital gains rates that apply to individuals receiving qualified dividend income (as discussed below), whether you take them in cash or in additional Shares.

Distributions of net capital gains, if any, that a Fund reports as capital gain dividends are taxable as long-term capital gains, whether paid in cash or reinvested in Shares and regardless of how long a shareholder has held Shares of the Fund. Long-term capital gains are generally taxed to non-corporate shareholders at a maximum rate currently set at 20% (lower rates apply to individuals in lower tax brackets).

Subject to certain limitations and requirements, dividends reported by a Fund as qualified dividend income will be taxable to non-corporate shareholders at rates of up to 20%. In general, dividends may be reported by a Fund as qualified dividend income if they are paid from dividends received by the Fund on common and preferred stock of U.S. companies or on stock of certain eligible foreign corporations, provided that certain holding period and other requirements are met by the Fund with respect to the dividend-paying stocks in its portfolio. Subject to certain limitations, eligible foreign corporations include those incorporated in possessions of the United States or in certain countries with comprehensive tax treaties with the United States, and other foreign corporations if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. Non-corporate shareholders will only be eligible for the rates of up to 20% on a Fund’s qualified dividend income distributions if the shareholders also meet certain holding period requirements with respect to their Shares in the Fund. The Funds’ trading strategies and investments in their wholly-owned Subsidiaries will significantly limit their ability to distribute dividends eligible for treatment as qualified dividend income. In addition, distributions that the Funds receive from investment companies taxable as a RIC will be treated as qualified dividend income only to the extent so reported by such investment companies.

Certain dividends received by a Fund on stock of U.S. corporations (generally, dividends received by the Fund in respect of any share of stock (1) as to which the Fund has met certain holding period requirements and (2) that is held in an unleveraged position) may be eligible for the dividends-received deduction generally available to corporate shareholders under the Internal Revenue Code, provided such dividends are also appropriately reported as eligible for the dividends-received deduction by the Fund. In order to qualify for the dividends-received deduction, corporate shareholders must also meet minimum holding period

requirements with respect to their Fund Shares, taking into account any holding period reductions from certain hedging or other transactions or positions that diminish their risk of loss with respect to their Fund shares. The Fund's trading strategies may significantly limit its ability to distribute dividends eligible for the dividends-received deduction for corporations

A Fund's participation in loans of securities may affect the amount, timing, and character of distributions to the Fund's shareholders. If a Fund participates in a securities lending transaction and receives a payment in lieu of dividends (a "substitute payment") with respect to securities on loan in a securities lending transaction, such income generally will not constitute qualified dividend income and thus dividends attributable to such income will not be eligible for taxation at the rates applicable to qualified dividend income. In addition, dividends attributable to such income will not be eligible for the dividends-received deduction for corporate shareholders.

Although dividends generally will be treated as distributed when paid, any dividend declared by a Fund in October, November or December and payable to shareholders of record in such a month that is paid during the following January will be treated for U.S. federal income tax purposes as received by shareholders on December 31 of the calendar year in which it was declared. In addition, certain other distributions made after the close of a taxable year of a Fund may be "spilled back" and treated for certain purposes as paid by the Fund during such taxable year. In such case, shareholders generally will be treated as having received such dividends in the taxable year in which the distributions were actually made. For purposes of calculating the amount of a RIC's undistributed income and gain subject to the 4% excise tax described above, such "spilled back" dividends are treated as paid by the RIC when they are actually paid.

If a Fund's distributions exceed its current and accumulated earnings and profits, all or a portion of the distributions made in the taxable year may be treated as a return of capital to shareholders. A return of capital distribution generally will not be taxable but will reduce the shareholder's cost basis and result in a higher capital gain or lower capital loss when the Shares on which the distribution was received are sold. After a shareholder's basis in the Shares has been reduced to zero, distributions in excess of earnings and profits will be treated as gain from the sale of the shareholder's Shares. The Funds intend to take appropriate measures to minimize the return of capital.

A Fund's shareholders will be notified annually by the Fund (or their brokers) as to the federal tax status of all distributions made by the Fund. Distributions may be subject to state and local taxes.

U.S. individuals with adjusted gross income (subject to certain adjustments) exceeding certain threshold amounts (\$250,000 if married and filing jointly or if considered a "surviving spouse" for federal income tax purposes, \$125,000 if married filing separately, and \$200,000 in other cases) are subject to a 3.8% Medicare contribution tax on all or a portion of their "net investment income." This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts. For these purposes, interest, dividends, and certain capital gains (including capital gain distributions and capital gains realized on the sale of shares of a Fund or the redemption of Creation Units), among other categories of income, are generally taken into account in computing a shareholder's net investment income.

A taxable shareholder may wish to avoid investing in a Fund shortly before a dividend or other distribution, because the distribution will generally be taxable even though it may economically represent a return of a portion of the shareholder's investment.

Shareholders who have not held shares of a Fund for a full year should be aware that the Fund may report and distribute to a shareholder, as ordinary dividends or capital gain dividends, a percentage of income that is not equal to the percentage of the Fund's ordinary income or net capital gain, respectively, actually earned during the shareholder's period of investment in the Fund.

Sales, Exchanges or Redemption of Shares. A sale of shares or redemption of Creation Units in a Fund may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of Shares will be treated as capital gain or loss if the Shares are capital assets in the shareholder's hands, and will be long-term capital gain or loss if the Shares have been held for more than 12 months, and short-term capital gain or loss if the Shares are held for 12 months or less. Any loss realized upon a taxable disposition of Shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any amounts treated as distributions to the shareholder of long-term capital gain with respect to the Shares (including any amounts credited to the shareholder as undistributed capital gains). All or a portion of any loss realized upon a taxable disposition of Shares of a Fund will be disallowed if substantially identical Shares of the Fund are purchased (through reinvestment of dividends or otherwise) within 30 days before or after the disposition. In such a case, the basis of the newly purchased Shares will be adjusted to reflect the disallowed loss.

An Authorized Participant who exchanges securities for Creation Units generally will recognize gain or loss from the exchange. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. Due to the ability of Authorized Participants to receive a full or partial cash redemption of Creation Units of a Fund, the Funds may be required to execute additional sale or exchange transactions of shares which may limit the tax efficiency of a Fund. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units and the exchanger's basis in the Creation Units. The IRS, however, may assert that a loss that is realized by an Authorized Participant upon an exchange of securities for Creation Units may not be currently deducted, under the rules governing "wash sales" (for an Authorized Participant that does not mark-to-market its holdings), or on the basis that there has been no significant change in economic position.

Any gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year (and were held as capital assets in the hands of the exchanging Authorized Participant). Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will be treated as short-term capital gains or losses. Any loss realized upon a redemption of Creation Units held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions to the applicable Authorized Participant of long-term capital gains with respect to the Creation Units (including any amounts credited to the Authorized Participant as undistributed capital gains).

The Trust on behalf of each Fund has the right to reject an order for a purchase of shares of a Fund if the purchaser (or group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding Shares of that Fund and if, pursuant to Section 351 of the Internal Revenue Code, that Fund would have a basis in the securities different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial Share ownership for purposes of the 80% determination. If a Fund does issue Creation Units to a purchaser (or group of purchasers) that would, upon obtaining the Shares so ordered, own 80% or more of the outstanding shares of the Fund, the purchaser (or group of purchasers) may not recognize gain or loss upon the exchange of securities for Creation Units.

Persons purchasing or redeeming Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rules apply and when a loss might be deductible.

Taxation of Fund Investments. Certain of the Funds' investments may be subject to complex provisions of the Internal Revenue Code (including provisions relating to hedging transactions, straddles, integrated transactions, foreign currency contracts, forward foreign currency contracts, and notional principal contracts) that, among other things, may affect the character of gains and losses realized by the Funds (*e.g.*, may affect the ability of the Funds' to qualify as a RIC, affect whether gains or losses are ordinary or capital), accelerate recognition of income to the Funds and defer losses. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions also may require the Funds to mark to market certain types of positions in their portfolios (*i.e.*, treat them as if they were closed out) which may cause the Funds to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the RIC distribution requirements for avoiding income and excise taxes. The Funds intend to monitor their transactions, intend to make appropriate tax elections, and intend to make appropriate entries in their books and records in order to mitigate the effect of these rules and preserve their qualification for treatment as RICs. To the extent a Fund invests in an Underlying Fund that is taxable as a RIC, the following discussion regarding the tax treatment of complex securities will also apply to the underlying funds that also invest in such complex securities and investments.

In particular, the Funds' investments in derivatives may be subject to numerous special and complex tax rules. These rules could affect whether gains and losses recognized by a Fund are treated as ordinary income and loss or capital gain and loss or whether capital gains and losses are long-term or short-term in nature, accelerate the recognition of income to the Fund and/or defer the Fund's ability to recognize losses. In turn, those rules may affect the amount, timing or character of the income distributed by a Fund.

Certain derivative investment by the Funds, such as exchange-traded products and over-the-counter derivatives may not produce qualifying income for purposes of the "90% Test" described above, which must be met in order for a Fund to maintain its status as a RIC under the Internal Revenue Code. In addition, the determination of the value and the identity of the issuer of such derivative investments are often unclear for purposes of the "Asset Test" described above. The Funds intend to carefully monitor such investments to ensure that any non-qualifying income does not exceed permissible limits and to ensure that they are adequately diversified under the Asset Test. The Funds, however, may not be able to accurately predict the non-qualifying income from these investments and there are no assurances that the IRS will agree with the Funds' determination of the "Asset Test" with respect to such derivatives.

In general, a foreign corporation that does not conduct a U.S. trade or business is nonetheless subject to tax at a flat rate of 30 percent, generally payable through withholding, on the gross amount of certain U.S.-source income that is not effectively connected with a U.S. trade or business. Income subject to such a flat tax includes dividends and certain interest income from U.S. sources.

Each Fund expects to invest up to 25% of its total assets in its respective Subsidiary, which the Funds expect to be treated as Controlled Foreign Corporations ("CFCs") under the Internal Revenue Code. The Funds expect their respective Subsidiary will make actual annual distributions in an amount at least equal to the subpart F income attributed to the Fund. To the extent the Subsidiaries make such distributions out of earnings and profits, the Funds expect such distributions to be treated as qualifying income. The Advisor will carefully monitor the Funds' investments in their respective Subsidiary to ensure that no more than 25% of each Funds' assets is invested in their respective Subsidiary.

Each of the Funds wholly owns its respective Subsidiary. A U.S. person that owns (directly, indirectly or constructively) 10% or more of the total combined voting power of all classes of stock of a foreign corporation is a "U.S. Shareholder" for purposes of the CFC provisions of the Internal Revenue Code. A foreign corporation is a CFC if, on any day of its taxable year, more than 50% of the voting power or value of its stock is owned (directly, indirectly or constructively) by "U.S. Shareholders." Because the Funds are each a U.S. person that will own all of the stock of its respective Subsidiary, each of the Funds will be a

“U.S. Shareholder” and each Subsidiary will be a CFC. As a “U.S. Shareholder,” the Funds will each be required to include in its gross income for United States federal income tax purposes its Subsidiary’s “subpart F income” (described below), whether or not such income is distributed by the Subsidiary. It is expected that all of each Subsidiary’s income will be “subpart F income.” It is expected that each Subsidiary will distribute all of its income to its respective Fund shareholder on at least an annual basis. “Subpart F income” generally includes interest, original issue discount, dividends, net gains from the disposition of stocks or securities, receipts with respect to securities loans and net payments received with respect to equity swaps and similar derivatives. “Subpart F income” also includes the excess of gains over losses from transactions (including futures, forward and similar transactions) in any commodities. Each Fund’s recognition of its respective Subsidiary’s “subpart F income” will increase each Fund’s tax basis in its Subsidiary. Distributions by each Subsidiary to its respective Fund will be tax-free, to the extent of its previously undistributed “subpart F income,” and will correspondingly reduce the Fund’s tax basis in the Subsidiary. “Subpart F income” is generally treated as ordinary income, regardless of the character of the Subsidiary’s underlying income.

In general, each “U.S. Shareholder” is required to file IRS Form 5471 with its U.S. federal income tax (or information) returns providing information about its ownership of the CFC Subsidiary. In addition, a “U.S. Shareholder” may in certain circumstances be required to report a disposition of shares in the Subsidiary by attaching IRS Form 5471 to its U.S. federal income tax (or information) return that it would normally file for the taxable year in which the disposition occurs. In general, these filing requirements will apply to investors of the Fund if the investor is a U.S. person who owns directly, indirectly or constructively (within the meaning of Sections 958(a) and (b) of the Internal Revenue Code) 10% or more of the total combined voting power of all classes of voting stock or 10 percent or more of the total value of shares of all classes of stock of a foreign corporation that is a CFC for an uninterrupted period of thirty (30) days or more during any tax year of the foreign corporation, and who owned that stock on the last day of that year.

Each Fund is required for federal income tax purposes to mark-to-market and recognize as income for each taxable year its net unrealized gains and losses on certain futures contracts as of the end of the year as well as those actually realized during the year. Gain or loss from futures and options contracts on broad-based indexes required to be marked to market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. A Fund may be required to defer the recognition of losses on futures contracts, options contracts and swaps to the extent of any unrecognized gains on offsetting positions held by the Fund. These provisions may also require the Funds to mark-to-market certain types of positions in their portfolios (i.e., treat them as if they were closed out), which may cause a Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirement and for avoiding the excise tax discussed above. Accordingly, in order to avoid certain income and excise taxes, a Fund may be required to liquidate its investments at a time when the investment adviser might not otherwise have chosen to do so. In addition, to the extent a Subsidiary trades in futures contracts described above, the special 60% long-term and 40% short-term capital gain or loss treatment will not pass through to a Fund when the Fund receives dividend distributions from the Subsidiary; rather such dividend distributions will be treated as ordinary income to a Fund.

A Fund may be subject to withholding and other taxes imposed by foreign countries, including taxes on interest, dividends and capital gains with respect to any investments in those countries. Any such taxes would, if imposed, reduce the yield on or return from those investments. Tax conventions between certain countries and the U.S. may reduce or eliminate such taxes in some cases. The Funds do not expect to satisfy the requirements for passing through to their shareholders any share of foreign taxes paid by the Funds, with the result that shareholders will not include such taxes in their gross incomes and will not be entitled to a tax deduction or credit for any such taxes on their own tax returns.

Backup Withholding. A Fund (or financial intermediaries, such as brokers, through which a shareholder holds Shares) will generally be required in certain cases to withhold at the applicable withholding rate and remit to the U.S. Treasury the withheld amount of dividends paid to any shareholder who (1) fails to provide a correct taxpayer identification number certified under penalty of perjury; (2) is subject to withholding by the IRS for failure to properly report all payments of interest or dividends; (3) fails to provide a certified statement that he or she is not subject to “backup withholding;” or (4) fails to provide a certified statement that he or she is a U.S. person (including a U.S. resident alien). The backup withholding rate is 24%. Backup withholding is not an additional tax and any amounts withheld may be credited against the shareholder’s ultimate U.S. tax liability.

Foreign Shareholders. Foreign shareholders (*i.e.*, nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. A Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of Shares of a Fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from a Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Unless certain non-U.S. entities that hold Fund Shares comply with IRS requirements that generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to Fund distributions payable to such entities and may apply to redemptions and certain capital gain dividends payable to such entities after December 31, 2018. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

A beneficial holder of Shares who is a foreign person may be subject to foreign, state and local tax and to the U.S. federal estate tax in addition to the federal income tax consequences referred to above. If a shareholder is eligible for the benefits of a tax treaty, any effectively connected income or gain will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment or fixed base maintained by the shareholder in the United States.

Tax-Exempt Shareholders. Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k)s, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income (“UBTI”). Under the Tax Act, tax-exempt entities are not permitted to offset losses from one trade or business against the income or gain of another trade or business. Certain net losses incurred prior to January 1, 2018 are permitted to offset gain and income created by an unrelated trade or business, if otherwise available. Under current law, the Funds generally serve to block UBTI from being realized by their tax-exempt shareholders. However, notwithstanding the foregoing, the tax-exempt shareholder could realize UBTI by virtue of an investment in the Funds where, for example: (i) a Fund invests in residual interests of Real Estate Mortgage Investment Conduits (“REMICs”), (ii) a Fund invests in a REIT that is a taxable mortgage pool (“TMP”) or that has a subsidiary that is a TMP or that invests in the residual interest of a

REMIC, or (iii) shares in a Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of section 514(b) of the Internal Revenue Code. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult their tax advisors regarding these issues.

Certain Potential Tax Reporting Requirements. Under U.S. Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance shareholders of a RIC are not excepted. A shareholder who fails to make the required disclosure to the IRS may be subject to substantial penalties. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Cost Basis Reporting. The cost basis of Shares acquired by purchase will generally be based on the amount paid for the Shares and then may be subsequently adjusted for other applicable transactions as required by the Internal Revenue Code. The difference between the selling price and the cost basis of Shares generally determines the amount of the capital gain or loss realized on the sale or exchange of Shares. Contact the broker through whom you purchased your Shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

State and Local Taxes. A Fund may be subject to tax or taxes in certain states where the Fund does business. Furthermore, in those states which have income tax laws, the tax treatment of a Fund and of Fund shareholders with respect to distributions by the Fund may differ from federal tax treatment.

General Considerations. The federal income tax discussion set forth above is for general information only. Prospective investors should consult their tax advisors regarding the specific federal income tax consequences of purchasing, holding and disposing of shares of a Fund, as well as the effect of state, local and foreign tax law and any proposed tax law changes.

CONSOLIDATED FINANCIAL STATEMENTS

The Funds' audited consolidated financial statements for the fiscal period ended November 30, 2017, including notes thereto and the report of Cohen & Company, Ltd., the Funds' Independent Registered Public Accounting Firm, are incorporated by reference into this SAI.

APPENDIX A

Bond Ratings

Below is a description of Standard & Poor's Ratings Group ("Standard & Poor's") and Moody's Investors Service, Inc. ("Moody's") bond rating categories.

Standard & Poor's Ratings Group Corporate Bond Ratings

AAA - This is the highest rating assigned by Standard & Poor's to a debt obligation and indicates an extremely strong capacity to pay principal and interest.

AA - Bonds rated "AA" also qualify as high-quality debt obligations. Capacity to pay principal and interest is very strong, and in the majority of instances they differ from "AAA" issues only in small degree.

A - Bonds rated "A" have a strong capacity to pay principal and interest, although they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than bonds in higher rated categories.

BBB - Bonds rated "BBB" are regarded as having an adequate capability to pay principal and interest. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay principal and interest for bonds in this category than for bonds in higher rated categories.

BB - Bonds rated "BB" have less near-term vulnerability to default than other speculative issues. However, they face major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments.

B - Bonds rated "b" have a greater vulnerability to default but currently have the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest and repay principal.

CCC - Bonds rated "CCC" have a currently identifiable vulnerability to default and are dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, they are not likely to have the capacity to pay interest and repay principal.

Moody's Investors Service, Inc. Corporate Bond Ratings

Aaa - Bonds rated "Aaa" are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to a "gilt-edged." Interest payments are protected by a large or by an exceptionally stable margin, and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa - Bonds rated "Aa" are judged to be of high quality by all standards. Together with the Aaa group, they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protections may not be as large as in "Aaa" securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long term risk appear somewhat larger than in "Aaa" securities.

A - Bonds rated “A” possess many favorable investment attributes, and are to be considered as upper medium grade obligations. Factors giving security principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment sometime in the future.

Baa - Bonds rated “Baa” are considered as medium grade obligations (*i.e.*, they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba - Bonds rated “Ba” are judged to have speculative elements. Their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

APPENDIX B

Exchange Traded Concepts, LLC

PROXY VOTING POLICIES AND PROCEDURES

Introduction

Exchange Traded Concepts, LLC (“ETC”) recognizes that proxies for companies whose securities are held in client portfolios have an economic value, and it seeks to maximize that economic value by ensuring that votes are cast in a manner that it believes to be in the best interest of the affected clients. Proxies are considered client assets and are to be managed with the same care, skill and diligence as all other client assets.

Proxy Voting Policies

Proxy voting will be conducted by either ETC or the sub-advisers.¹ To the extent that ETC is responsible for proxy voting, ETC has engaged Institutional Shareholder Services (“ISS”), to provide research on proxy matters and voting recommendations, and to cast votes on behalf of ETC. ISS executes and maintains appropriate records related to the proxy voting process, and ETC has access to those records. ETC maintains records of differences, if any, between this Policy and the actual votes cast. ETC may, in the future, decide to engage a different proxy advisory firm.

ETC has reviewed ISS’s voting guidelines and has determined that those guidelines provide guidance in the best interest of ETC’s clients. This Policy and ISS’s proxy voting guidelines will be reviewed at least annually. This review will include, but will not necessarily be limited to, any proxy voting issues that may have arisen or any material conflicts of interest that were identified and the steps that were taken to resolve those conflicts.

There may be times when ETC believes that the best interests of the client will be better served if ETC votes a proxy counter to ISS’s guidelines pertaining to the matter to be voted upon. In those cases, ETC will generally review the research provided by ISS on the particular issue, and it may also conduct its own research or solicit additional research from another third party on the issue. After considering this information and, as necessary, discussing the issue with other relevant parties, ETC will determine how to vote on the issue in a manner which ETC believes is consistent with this Policy and in the best interests of the client.

Each sub-adviser’s proxy voting policies and procedures have been approved by the Trusts’ Board of Trustees and when a sub-adviser has been delegated authority to vote a proxy, it will vote such proxy in accordance with the approved proxy voting policies and procedures.

In addition, the sub-advisers may engage the services of an independent third party (“Proxy Firm”) to cast proxy votes according to the sub-advisers’ established guidelines. ETC has deemed in the best interest of clients to permit a sub-adviser the authority to cast proxy votes in accordance with the proxy voting policies

¹ As of the date of the last revision to this Policy, ETC’s only clients are the series (or portfolios) of Exchange Traded Concepts Trust, Exchange Listed Funds Trust, and ETF Series Solutions (the “Trusts”) for which ETC serves as investment adviser. ETC has engaged one or more sub-advisers for such series. For some series, ETC is responsible for voting proxies and, for the remaining series, a sub-adviser is responsible for proxy voting.

submitted by that firm and approved by the Trusts' Board of Trustees. The sub-adviser must promptly notify ETC of any proxy votes that are not voted consistently with the guidelines set forth in its policy.

Conflict of Interest Identification and Resolution

Although ETC does not believe that conflicts of interest will generally arise in connection with its proxy voting policies, ETC seeks to minimize the potential for conflict by utilizing the services of ISS to provide voting recommendations that are consistent with relevant regulatory requirements. Occasions may arise during the analysis and voting process in which the best financial interests of clients might conflict with the interests of ISS. ISS has developed a "separation wall" as security between its proxy recommendation service and the other services it and its affiliated companies provide to clients who may also be a portfolio company for which proxies are solicited.

In resolving a conflict, ETC may decide to take one of the following courses of action: (1) determine that the conflict or potential conflict is not material, (2) request that disclosure be made to clients for whom proxies will be voted to disclose the conflict of interest and the recommended proxy vote and to obtain consent from such clients, (3) ETC may vote the proxy or engage an independent third-party or fiduciary to determine how the proxies should be voted, (4) abstain from voting or (5) take another course of action that adequately addresses the potential for conflict. Employees are required to report to the CCO any attempted or actual improper influence regarding proxy voting.

ETC will provide clients a copy of the complete Policy. ETC will also provide to clients, upon request, information on how their securities were voted.

Proxy Voting Operational Procedures

Reconciliation Process

Each account's custodian provides holdings to ISS on a daily basis. Proxy materials are sent to ISS, which verifies that materials for future shareholder meetings are received for each record date position. ISS researches and resolves situations where expected proxy materials have not been received. ISS also notifies ETC of any proxy materials received that were not expected.

Voting Identified Proxies

A proxy is identified when it is reported through the ISS automated system or when a custodian bank notifies ISS of its existence. As a general rule, ETC votes all proxies that it is entitled to vote that are identified within the solicitation period. ETC may apply a cost-benefit analysis to determine whether to vote a proxy. For example, if ETC is required to re-register shares of a company in order to vote a proxy and that re-registration process imposes trading and transfer restrictions on the shares, commonly referred to as "blocking," ETC generally abstains from voting that proxy.

Although not necessarily an exhaustive list, other instances in which ETC may be unable or may determine not to vote a proxy are as follows: (1) situations where the underlying securities have been lent out pursuant to an account's participation in a securities lending program and the cost-benefit ETC analysis indicates that the cost to recall the security outweighs the benefit; (2) instances when proxy materials are not delivered or are delivered in a manner that does not provide ETC sufficient time to analyze the proxy and make an informed decision by the voting deadline; and (3) occasions when required local-market documentation cannot be filed and approved prior to the proxy voting deadline.

Proxy Oversight Procedures

In order to fulfill its oversight responsibilities related to the use of a proxy advisory firm, ETC will conduct a due diligence review of ISS annually and requests, at a minimum, the following information:

- ◆ ISS' Policies, Procedures and Practices Regarding Potential Conflicts of Interest
- ◆ ISS' Regulatory Code of Ethics
- ◆ The most recent SSAE 16 report of ISS controls conducted by an independent auditor (if available)
- ◆ ISS' Form ADV Part 2 to determine whether ISS disclosed any new potential conflicts of interest

On a quarterly basis, ETC will request from ISS a certification indicating that all proxies were voted and voted in accordance with pre-determined guidelines and a summary of any material changes to the firm's policies and procedures designed to address conflicts of interest. In addition, a Proxy Voting Record Report is reviewed by ETC on a periodic basis. The Proxy Voting Record Report includes all proxies that were voted during a period of time.

In order to fulfill its oversight responsibilities when a sub-adviser is responsible for voting proxies, ETC will request a certification of compliance and completion and review the sub-advisers' Proxy Voting Record Report on a periodic basis.

Maintenance of Proxy Voting Records

The following records are maintained for a period of five years, with records being maintained for the first two years on site:

- These policy and procedures, and any amendments thereto;
- Each proxy statement (the majority of which are maintained on a third-party automated system);
- Record of each vote cast;
- Documentation, if any, created by ETC that was material to making a decision how to vote proxies on behalf of a client or that memorializes the basis for a decision;
- Various reports related to the above procedures; and
- Each written client request for information and a copy of any written response by ETC to a client's written or oral request for information.
